

**Oil Spill Contingency Plan  
Emergency Oil Spill Booming – Potential Locations  
Boatyards Basins/Mooring Dykes etc**

The following are locations where there is and increased risk of oil spillage due to boatyard operations, refuelling etc. and where containment booming could be effective to contain oilspills close to source and minimise spread of oil into the main river system.

This schedule is complimentary to Appendix 10 which indicates strategic containment or deflection booming sites where deployment might protect particular areas, including conservation designated sites, nature reserves etc.

River Bure

Wroxham	Bridge Broad moorings/ Connoisseur Cruisers Across entrance to broad/moorings
Wroxham	Broads Tours/Faircraft Loynes mooring basin entrance
