1. Summary

This matrix identifies the impacts of the Local Plan policies on the various SA Objectives, taken as a whole.

Please note that this table does not include assessment of the vision, the housing or residential mooring numbers and not the specific Local Green Space and Open Space allocations that are related to the relevant policies. It is simply a matrix of the policies.

The objectives with the most positives (more than 40) relate to:

- Traffic
- Water quality and efficiency

- Biodiversity and geodiversity
- Landscape
- Sustainable resources
- Heritage
- Design
- Health
- Tourism

The objectives with negatives are access to services and facilities, greenfield land and housing delivery.

The objectives with the least positives (less than 10) relate to:

- Coastal change
- Renewable energy
- Poverty and inequality
- Waste

Page 6 of 203

2. Introduction

2.1. About Sustainability Appraisals

A Sustainability Appraisal of the Publication Local Plan has been prepared and is also published for consultation.

The Planning and Compulsory Purchase Act 2004 requires a Sustainability Appraisal (SA) to be undertaken for Local Plans. The Broads Local Plan SA will examine whether the effects of the specific sites/areas allocations and policies, individually or collectively, give rise to sustainability benefits or dis-benefits. The SA assesses the short, medium and long-term social, environmental and economic effects of the individual policy options and the combined effects, in these terms, of the policies for the whole area.

The process for conducting the sustainability appraisal is over page.

The task of this sustainability appraisal is firstly to assess the short, medium and long-term social, environmental and economic effects of the individual policy options and assess the combined effects, in these terms, of the policies of the whole area.

2.2. Strategic Environmental Assessment

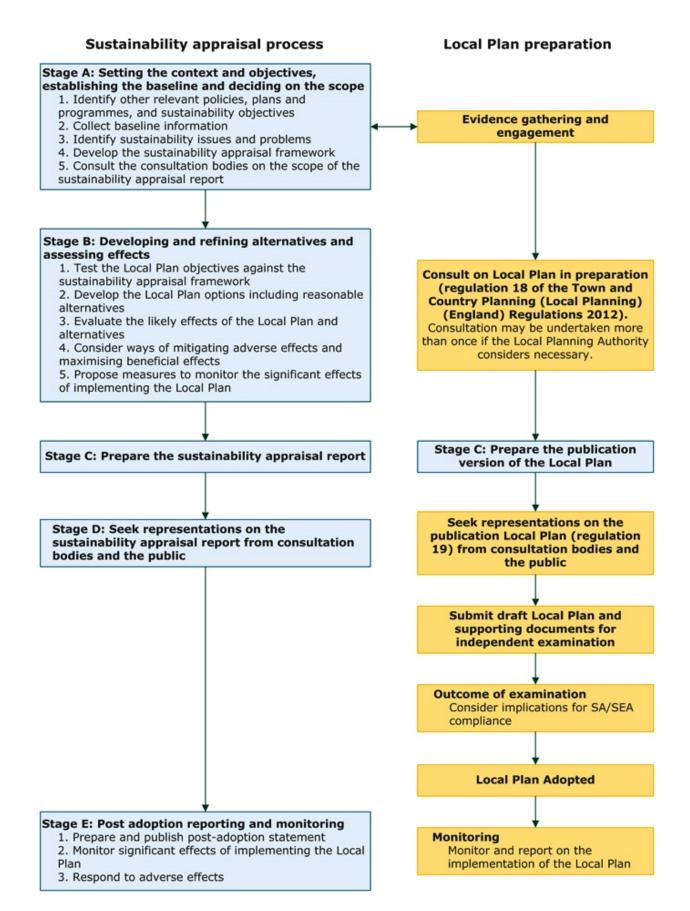

Strategic Environmental Assessment (SEA) involves the systematic identification and subsequent evaluation of the environmental impacts of a strategic action such as a plan or programme. The objective of the SEA process is to provide for a high level of protection of the environment, and to integrate environmental considerations into the preparation and adoption of plans. The relevant requirements and considerations are set out in the assessment of the effects of certain plans and programmes on the environment directive and national regulations.

Sustainability appraisals incorporate the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004, which implement the requirements of the European Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment. Sustainability appraisal ensures that potential environmental effects are given full consideration alongside social and economic issues.

2.3. Appropriate Assessment (Habitats)

The Conservation of Habitats and Species Regulations 2010, as amended, normally referred to as 'the Habitats Regulations,' transpose the requirements of the EU Habitats and Birds Directives into UK law. The Regulations require a Habitats Regulations Assessment (HRA) to assess potential impacts from the plan on European wildlife sites. This plan has been the subject of HRA, and measures have been embedded within the plan to protect European sites, including in relation to recreation pressure, tourism and water based activities. The HRA is updated alongside the plan, informing any modifications in light of potential effects on European sites. The final plan is adopted with certainty that European sites will not be adversely affected by its implementation. Project level HRAs will be required to ensure that detailed project design secures European site protection. A HRA of the Broads Local Plan Publication version has been prepared and is also published for consultation¹.

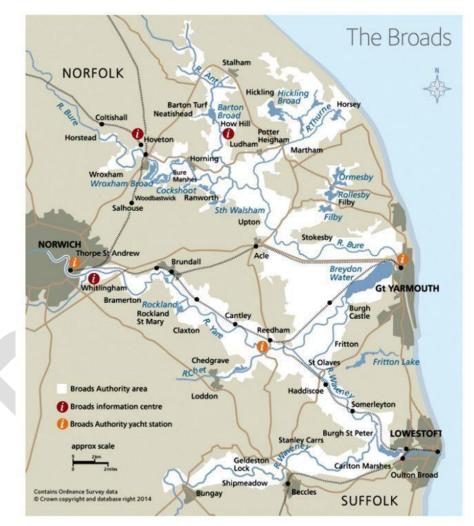

¹ <u>http://www.broads-authority.gov.uk/broads-authority/how-we-work/transparency/consultations</u>

3. Background

3.1. The Broads And The Broads Authority

The Norfolk and Suffolk Broads is Britain's largest protected wetland and third largest inland waterway, with the status of a national park. It's also home to some of the rarest plants and animals in the UK. The Broads area is an internationally important wetland and a nationally designated protected landscape of the highest order, part of the family of national parks. The designated Broads area is shown below. It includes parts of both Norfolk and Suffolk counties. This is the geographical scope of the Local Plan.

Broads Authority executive area map

The Broads Authority has a statutory duty to manage the Broads for three specific purposes. None of these purposes takes precedence.

- Conserving and enhancing the natural beauty, wildlife and cultural heritage of the Broads;
- Promoting opportunities for the understanding and enjoyment of the special qualities of the Broads by the public; and
- Protecting the interests of navigation.

Additionally, in discharging its functions, the Authority must have regard to:

- the national importance of the Broads as an area of natural beauty and one which affords opportunities for open-air recreation;
- the desirability of protecting the natural resources of the Broads from damage; and
- the needs of agriculture and forestry and the economic and social interests of those who live or work in the Broads.

The Broads Authority is the local planning authority for the Broads, responsible for producing and updating the Broads Local Plan which guides development in the area. The area includes parts of Broadland District, South Norfolk District, North Norfolk District, Great Yarmouth Borough, Norwich City and Waveney District. The councils for those areas do not have planning powers in the Broads area, but retain all other local authority powers and responsibilities.

3.2. The Broads' Local Plan

The Broads Authority is preparing a Local Plan to replace the adopted Core Strategy (adopted 2007), Development Management Policies DPD (adopted 2011) and Sites Specifics Local Plan (adopted 2014). It is also intended that the only saved 1997 Local Plan policy relating to Thorpe Island will also be reviewed. The Local Plan process will review and carry forward and update relevant policies from all these documents as well as research the potential for a policy response to some other local issues such as residential moorings, floating homes, second homes and holiday homes, green infrastructure and economic development.

The Authority will use a sustainability appraisal to help identify and choose between potential options for the policies and site allocations. The sustainability appraisal will also encompass the Strategic Environmental Assessment required by European Directive and UK Regulations.

This Scoping Report is intended to form the basis of this sustainability appraisal and is being sent to the statutory environmental bodies Environment Agency, Natural England and Historic England to obtain their views on it.

3.3. Previous Sustainability Appraisal Documents

The Issues and Options Local Plan was accompanied by an Interim Sustainability Appraisal which can be found here: <u>http://www.broads-</u>

authority.gov.uk/ data/assets/pdf file/0011/710858/Broads-Local-Plan-Issues-and-Options-Interim-SA-Final.pdf

The Preferred Options Local Plan was accompanied by a Sustainability Appraisal which can be found here: <u>http://www.broads-authority.gov.uk/ data/assets/pdf file/0004/833971/Broads-Local-Plan-Preferred-Options-Sustainability-Appraisal.pdf</u>

3.4. About This Consultation

The Sustainability Appraisal is out for consultation at the same time as the Local Plan. The consultation runs for a period of 6 weeks from 4 October to 4pm on 15 November 2017.

4. Challenges and Opportunities

This section identifies some of the principle sustainability challenges and opportunities in the area that are potentially relevant to the Broads Local Plan.

Strengths

- Extensive, diverse and very highly valued landscape, habitats, flora, fauna and cultural and heritage assets.
- A unique wetland and low-lying area and member of the National Parks family.
- Formal nature conservation designations of the Broads and many areas within it provide relatively high levels of policy protection or conservation.
- A short undeveloped stretch of coastline.
- High levels of tranquillity through much of the Broads; in particular, a sense of remoteness in some parts despite these being located close to concentrations of housing and industry.
- Attractive environment, providing the basis for most of the Broads' economy and recreation for residents and visitors.
- Britain's largest protected wetland and fourth largest inland waterway, with the status equivalent to a National Park
- High level of interaction with the surrounding area, with complementary provision of facilities and opportunities. For example, employment and development opportunities, community facilities, etc. in surrounding districts, towns and in Norwich also serve Broads residents, while the Broads provides recreational and business opportunities to those from the wider area.
- Thriving hire boat industry contributing to the local economy.
- Many organisations and individuals caring for or promoting the value of various aspects of the Broads.
- o Importance of the Broads for the identity and recreation of a much wider area.
- The age profile of the area shows more older-aged persons than the surrounding area. Older people are often motivated, educated and experienced and play an important role in the community.
- Substantial, engaged community of private boat owners.
- Local boating clubs and classes that enable local people (whether or not boat owners), including children, to acquire and hone the skills required to become good sailors
- o Only few (or localised) visual impacts from development outside the area of the Broads.
- Many heritage assets including conservation areas and drainage mills.
- The international significance of the paleo-archaeological remains within the Broads and the unusually well preserved organic remains.
- o A wealth of archaeological deposits that are not well represented elsewhere within the country

Weaknesses

- Some of the protected habitats in less than optimal condition and/or vulnerable to change as a result of, for example, fragmentation, inappropriate land management and pressure from nearby development.
 Some areas of fen and some lakes in decline.
- Almost the whole of the Broads area subject to, or at risk of, flooding.
- High levels of listed buildings and other heritage assets at risk, and particular problems in finding compatible and beneficial uses that could help secure the restoration and maintenance of heritage assets such as wind pumps/drainage mills.
- Continuing (though declining) problems of water quality in the rivers. Ground water quality problems.

- Difficulty of modernising and adapting existing buildings and uses, and accommodating new ones, due to flood prone nature of the area.
- o Decline in traditional industries such as millwrights and reed and sedge cutters.
- High reliance on tourism which can leave the economy vulnerable and mean a loss of resilience as a result of changes to the holiday/recreational patterns.
- Car dependence of local communities and businesses and fragmentation of settlements.
- Depleted local community and/or visitor facilities, often through displacement by higher value activities (principally housing).
- Tensions and perceptions of incompatibility between interests of conservation, recreation, tourism, navigation and local communities, and between local interests and the national value of the Broads.
- The ageing population could lead to imbalance in the community.
- Lack of housing that is affordable resulting in some people having to commute to places of work.
- o Deficiencies of moorings in some places to meet the needs of various waterspace users.
- Increasing pressures for land use change around areas of settlement.
- o Resourcing difficulties for organisations that help to manage the environmental assets.
- o Reliance on agricultural subsidies to promote land management for nature conservation.

Opportunities

- Climate change:
 - Likely impacts that may create opportunities such as changes in flora, fauna and landscape, patterns of recreation and changes in agriculture and its practices.
 - Adaption through erecting, raising and strengthening flood defences, realignment in more flood prone locations to make more space for water and linking wildlife habitats to provide resilience.
 - Evolving low carbon lifestyles, construction and patterns of land use and settlement.
- Maintaining the recovery and improvement of water quality achieved over the last few decades by long term and ongoing action across a range of agencies.
- Potential to put in place environmental and recreational management measures as part of the implementation of major housing and employment growth outside but close to the Broads area.
- To connect wetland habitats on a landscape scale, to enhance and buffer biodiversity rich areas.
- Potential for revival in the use of the area's rivers and railways for freight and passenger traffic.
- Changes in patterns of recreation and expectations of visitors, including impacts of earlier major decline in hire boat fleet and growth of private boat ownership; higher expectation of facilities for leisure plots, holiday chalets and other accommodation.
- Potential for complementary and mutually supportive actions and benefits across environmental, recreational, navigation, and local community issues.
- Provision of jobs, facilities, services and homes for local residents through the development plans of constituent Local Authorities.
- The status of the Broads as equivalent to a National Park held in high regard at a local and national level.
- Training opportunities for traditional skills and crafts.
- Encouraging sustainability through the design of buildings as well as innovative designs, new technologies and building in resilience.

- Opportunities to encourage both local residents and visitors to join one of the many boating clubs, take part in organised events, go on formal sailing courses and gain recognised Royal Yachting Association (RYA) qualifications.
- o To Improve awareness of general public and residents of the special qualities of the Broads
- o Major highway improvements and the benefits to the community and economy they could bring.
- Flat land favouring healthy travel modes.
- o More home based working lessening carbon impacts but retaining wealth in the locality.

Threats

0

- o Climate change likely impacts that may be threats:
 - Increased frequency and severity of all sources of flooding
 - Increased risk of coastal inundation
 - Changes in water quality and quantity
 - Increased frequency and severity of saline incursion into fresh water systems
 - Changes in flora, fauna and landscape
 - Changes in patterns of recreation
 - Changes in agriculture and its practices
 - Redundancy/degradation of infrastructure and material assets
 - Erosion of the special character of the area's landscape and built heritage through:
 - Loss of archaeology built/landscape and cultural heritage assets.
 - Saline intrusion.
 - Coastal erosion.
 - Incremental 'suburbanisation' and other changes, including through domestic and holiday home extensions/enlargements and paraphernalia:
 - Metalling of unmade tracks;
 - 'Horsiculture' proliferation of pony paddocks, stables, Manége s, etc.;
 - Road, rail and navigation improvements/changes;
 - Proliferation of advertisements.
- Potential landscape and economic effects of change, including that driven by market changes (e.g. food prices, bio-fuel).
- Changes in patterns of recreation, including impacts of earlier major decline in hire boat fleet and growth of private boat ownership; higher expectation of facilities for leisure plots, holiday chalets and other accommodation.
- Declining boatyard and boatbuilding industry.
- Loss of local and traditional skills.
- Pinch-points at bridges, no passing places and low levels of infrastructure allied to industry / business and even residential could limit potential for more use of water.
- Major housing and employment growth planned for nearby areas, and associated potential impacts such as:
 - Water quality and quantity loss arising from effluent input and supply extraction.
 - Increased recreational pressure, on both visitor 'honeypots' and remoter, more tranquil and sensitive localities.
 - Traffic growth.
- Passing of the economies, practices and ways of life that generated and sustained those landscapes.

- Unsympathetic design, construction and alterations.
- Loss of local community and/or visitor facilities, often through displacement by higher value activities (principally housing).
- High house prices in the rural areas could affect the willingness of some to train in traditional skills such as reed and sedge cutting as they would need to commute.
- Recent and likely future cuts in budgets and consequent challenges organisations face in light of reduced funds.
- Palaeo-environmental and organic archaeological remains are especially vulnerable and significant in the Broads.
- Potential damage to protected wildlife sites through activities in the Broads and more development in the wider area.
- Major highway improvements and the threat to the special qualities of the Broads that could result.
- Further loss of moorings.
- Vulnerability of subsidised public transport services within the broads (bus and rail).

Page 14 of 203

5. The Sustainability Appraisal Objectives and Decision Making Criteria

The Scoping Report for the SA was consulted on from 13 October to 14 November 2014. A further consultation of changes to the SA Objectives was undertaken in April 2016 (see Appendix A). In general, the proposed approach to the SA was well received.

| SA Objective |
|---|
| ENV1: To reduce the adverse effects of traffic (on roads and water). |
| ENV2: To improve water quality and use water efficiently. |
| ENV3: To protect and enhance biodiversity and geodiversity. |
| ENV4: To conserve and enhance the quality and local distinctiveness of landscapes and towns/villages. |
| ENV5: To adapt to and mitigate against the impacts of climate change. |
| ENV6: To avoid, reduce and manage flood risk. |
| ENV7: To manage resources sustainably through the effective use of land, energy and materials. |
| ENV8: To minimise the production and impacts of waste through reducing what is wasted, re-using and recycling |
| what is left. |
| ENV9: To conserve and enhance the cultural heritage, historic environment, heritage assets and their settings |
| ENV10: To achieve the highest quality of design that is innovative, imaginative, and sustainable and reflects local |
| distinctiveness. |
| ENV11: To improve air quality and minimise noise, vibration and light pollution. |
| ENV12: To increase the proportion of energy generated through renewable/low carbon processes without |
| unacceptable adverse impacts to/on the Broads landscape |
| ENV13: To reduce vulnerability to coastal change. |
| SOC1: To improve the health of the population and promote a healthy lifestyle. |
| SCO2: To reduce poverty, inequality and social exclusion. |
| SOC3: To improve education and skills including those related to local traditional industries. |
| SOC4: To enable suitable stock of housing meeting local needs including affordability. |
| SOC5: To maximise opportunities for new/ additional employment |
| SOC6a: To improve the quality, range and accessibility of community services and facilities. |
| SOC6b: To ensure new development is sustainability located with good access by means other than a private car |
| to a range of community services and facilities. |
| SOC7: To build community identity, improve social welfare and reduce crime and anti-social activity. |
| ECO1: To support a flourishing and sustainable economy |
| ECO2: To ensure the economy actively contributes to social and environmental well-being. |
| ECO3: To improve economic performance in rural areas. |
| ECO4: To offer opportunities for Tourism and recreation in a way that helps the economy, society and the |
| environment. |

The Decision Making Criteria are listed at Appendix F: Decision Making Criteria.

6. Compatibility of the SA Objectives and Local Plan Objectives

| | | | ENV1 | ENV2 | ENV3 | ENV4 | ENV5 | ENV6 | ENV7 | ENV8 | | ENV11 | ENV12 | ENV13 | SOC1 | SOC2 | SOC3 | SOC4 | SOC2 | SOC6 | SOC7 | ECO1 | ECO2 | ECO3 | ECO4 |
|-----------------------|-------|--|------|------|------|------|------|------|------|------|-----|-------|-------|-------|------|------|------|------|------|------|------|------|------|------|------|
| | OBJ1 | The Broads remains a key national and international asset and a special place to live, work and visit. | + | + | + | + | + | + | + | + - | + + | + | + | + | + | + | + | ? | + | + | + | + | + | + | + |
| | OBJ2 | There are areas of true tranquillity and wildness, giving a real sense of remoteness. | + | | + | + | | | + | - | F | + | | | + | | | ? | ? | | | ? | ? | ? | ? |
| | OBJ3 | The Broads is a unique, highly valued and attractive environment where the landscape character and setting is protected, maintained and enhanced. | + | | + | + | | | + | - | + + | | | + | + | | + | ? | | | + | | | | + |
| | OBJ4 | The rich and varied habitats and wildlife are conserved, maintained, enhanced and sustainably managed. | | + | + | + | + | | + | - | + + | + | | | + | | + | ? | | | + | | | | + |
| | OBJ5 | The coastal section of the Broads is used and managed in a balanced way for people and wildlife. | | | + | + | + | + | | | | | | + | + | | | ? | | | | | | | + |
| | OBJ6 | Water quality is improved and water is managed to increase capture and efficiency, prevent pollution and reduce nutrients. Flood risk to people, property and landscapes is managed effectively. | | + | + | | + | + | | | + | | | + | + | | | + | | | | | + | | |
| S | OBJ7 | 'Climate-smart thinking' minimises future adverse impacts and makes use of opportunities in an area vulnerable to a changing climate and sea level rise. | + | | + | | + | + | + | + | + | + | + | + | + | | | | | + | | | + | | + |
| jectiv€ | OBJ8 | The area's historic environment and cultural heritage are protected, maintained and enhanced. Local cultural traditions and skills are kept alive. | | | | + | | | + | - | + + | | | | | | + | | | | + | | | | + |
| , qo | OBJ9 | The housing needs of the community are met. | ? | ? | ? | ~ | ? | ? | ? | ? 1 | ? ? | ? | ? | ? | | | | + | + | | | + | | | |
| Local Plan Objectives | OBJ10 | Development and change are managed to protect and enhance the special qualities of the Broads as well as the needs of those who live in, work in and visit the area. The Broads Authority maintains close cooperation with the Local Planning Authorities adjoining its executive area. | + | + | + | + | + | + | + | - | + + | + | | + | + | | + | + | + | + | + | + | + | + | + |
| | OBJ11 | The Broads offers communities and visitors opportunities for a healthy and active lifestyle and a 'breathing space for the cure of souls'. | + | | | + | | + | | | | + | | | + | + | | | + | + | + | | | | |
| | OBJ12 | There is a buoyant and successful rural economy. | | | | | | | | | | | | | | + | | + | | | | + | + | + | + |
| | OBJ13 | The Broads is renowned for sustainable tourism and supports a prosperous tourism industry. | | | | | | | | | | | | | | + | | + | | | | + | + | + | + |
| | OBJ14 | People enjoy the special qualities of the Broads on land and on water. Access and recreation is managed in ways that maximise opportunities for enjoyment without degrading the natural, heritage or cultural resource. Navigation is protected, maintained and appropriately enhanced, and people enjoy the waterways safely. | + | + | + | + | | | | - | + + | + | | + | + | | + | | + | | + | + | + | + | + |
| | OBJ15 | The Broads continues to be important for the function, identity and recreation of the local community as well as over a wider area. | | | | | | | | | | | | | + | | | + | + | + | | | | + | + |
| | OBJ16 | Waste is managed effectively so there is no detriment to the environment. | | | | | | | | + | | | | | | | | | | _ | | | | | |

OBJ2/SOC and ECO objectives – there are many ?s (uncertain effect). This is because on one hand tranquillity and wildness can be a reason why tourists come to the area and indeed businesses may relate to the tranquil and wild nature of the Broads (such as making the most of the dark skies of the Broads through astro-tourism), this could lead to impacting on the tranquil and wild nature of the Broads itself. There are other objectives and related policies which seek to protect the tranquillity of certain areas of the Broads.

OBJ1/SOC4, OBJ2/SOC4, OBJ3/SOC4, OBJ5/SOC4, OBJ9/ENV objectives – There are many ?s (uncertain effects). This is because it depends on how schemes to meet the housing need of the population/enable suitable stock of housing to meet local needs are delivered. There are other objectives and related policies that seek to ensure the need is met in a way that minimises or negates any impact on the environmental objectives.

7. Assessing the Draft Policies against the Sustainability Appraisal Objectives

The Vision of the Broads Local Plan

Note that an alternative vision has not been produced to then be assessed. The vision is the same as the Broads Plan's vision and the Authority wishes for the two plans to align in this way. The assessment of the vision is generally positive.

No Model Policy. This option has been discarded as it is normal for Local Plans to include this policy. This model policy is also rolled forward from the 2014 Site Specific Local Plan.

Note that this policy has been split into other policies. The table below shows the assessment of the Preferred Options policy. The main reason for this change is to locate topic specific parts of this policy in that particular section as well as to make the strategic policies more manageable; this policy was very big.

| | 'I ' [| Publication version | No Policy | More detailed policy |
|-------------------------------------|-------------------------|---|---|--|
| Sustainability Appraisal Objectives | ENV11 ENV12 ENV13 | Publication version + | No Policy ? >< | Not rated as the individual policies in this Local Plan are detailed and meet the thrust of this overarching policy. |

Broads Local Plan – Publication Local Plan - Sustainability Appraisal – September 2017 Removed from Publication Local Plan: Policy POSP3: Air, water and waste

Note that this policy has been split into other policies. The table below shows the assessment of the Preferred Options policy. The main reason for this is to locate topic specific parts of this policy in that particular section as well as to make the strategic policies more manageable.

| | | _ | | | | |

| | ECO3 | | | | | |
| | ECO4 | | | | | |

Policy PUBDM6: Open Space on land, play, sports fields and allotments policy

Publication version No Policy ENV1 ENV2 Biodiversity could use the open space. ? ENV3 ? Open space can add to the town/street/land scape ENV4 ENV5 Open spaces are areas where water can infiltrate in general ? ENV6 ENV7 ENV8 Sustainability Appraisal Objectives ENV9 Open space can add to the design of the scheme ? ENV10 ENV11 No policy does not necessarily mean that open ENV12 space will not be delivered as could be ENV13 negotiated at planning application stage. A policy Open space is used by people to undertake activities and therefore benefits health. however gives a more formal approach. As such, SOC1 not having a policy was discounted. SOC2 SOC3 Whilst being a requirement for developers to address, can make a scheme more ? attractive to future occupiers. SOC4 SOC5 Such facilities are appreciated by the community and tend to be delivered close 2 SOC6ab the community that uses them. SOC7 ECO1 ECO2 ECO3 ECO4

Note that the Publication version of this policy is generally the same as the Preferred Option, but made simpler. The assessment of the policy is the same.

Other alternatives:

- An alternative option is to undertake our own assessment on open space in the Broads. However, the Authority's constituent districts undertake this study for the entire district. Completing a separate one for the Broads would be duplicating work.
- We could allocate other areas of open space. This is done to some extent as per the Local Green Space policy which allocates some other areas of open/green space.

Policy PUBDM7: Green Infrastructure (GI)

Only minor changes have been made to the Preferred Options version of this policy. No change to the assessment.

| | | | Publication version | | No Policy | | | |
|-------------------------------------|--------|---|--|---|---|--|--|--|
| | ENV1 | + | Some types of GI are off-road routes | ? | | | | |
| | ENV2 | | | | | | | |
| | ENV3 | + | One of the fundamental aims of GI is to benefit biodiversity. | ? | | | | |
| | ENV4 | + | GI can enhance the area | ? | | | | |
| | ENV5 | | | | | | | |
| | ENV6 | | | | | | | |
| | ENV7 | | | | | | | |
| | ENV8 | | | | | | | |
| 'es | ENV9 | | | | | | | |
| Sustainability Appraisal Objectives | ENV10 | + | GI can be incorporated into a scheme. | | | | | |
| ⊃bje | ENV11 | | | | | | | |
| sal (| ENV12 | | | | Not having a policy does not | | | |
| prai | ENV13 | | | | mean that GI will be lost or not provided. A policy provides more | | | |
| / Ap | | + | GI can be used by people to provide active lifestyles as well as be | ? | certainty. As such, not having a | | | |
| oility | SOC1 | | appreciated by people thus benefiting wellbeing. | | policy was discounted. | | | |
| inak | SOC2 | | | | | | | |
| ısta | SOC3 | | Cheen enable come advance to colored, to militate represtion | | - | | | |
| SI | SOC4 | + | GI can enable some schemes to go ahead – to mitigate recreation impact. | | | | | |
| | SOC5 | | | | | | | |
| | SOC6ab | | | | | | | |
| | SOC7 | | | | | | | |
| | ECO1 | | | | | | | |
| | ECO2 | | | | | | | |
| | ECO3 | | | | | | | |
| | ECO4 | + | Some GI is why people come to the area. For example the long walking routes. | ? | | | | |

Another option is to have site specific Green Infrastructure policies. To some extent other policies in the Local Plan relate to Green Infrastructure such as open space, local green space and safeguarding disused railway tracks for recreation routes. There is a need for an overarching policy to capture green infrastructure assets that do not have their own policy.

Policy PUBSP3: Climate Change There is one change to the policy that results in a positive against ENV3 – the reference to biodiversity and adaption. The change is highlighted in red.

| | | | Publication version | | No Policy | No change to CS8 |
|-------------------------------------|--------|----------|--|---|--|---|
| | | <u>ـ</u> | Policy refers to travel plans as a way of minimising | ? | | 5 |
| | ENV1 | + | contributions to climate change. | | | |

| | ECO3 | | | | | | | |
| | ECO4 | | | | | | | |

Policy PUBDM16: Land Raising

Only some minor changes to the Preferred Options version which adds clarity to the policy. The change to the criterion D makes the policy rate stronger against ENV9.

| | | | Publication version | | No Policy |
|-------------------------------------|--------|----|---|---|--|
| | ENV1 | | | | |
| | ENV2 | | | | |
| | ENV3 | + | Policy refers to impact on biodiversity. | ? | |
| | ENV4 | + | Land raising can impact on landscape | ? | |
| | ENV5 | | | | |
| | ENV6 | + | Whilst land raising may make one plot safer from flooding, the impact is moved elsewhere. | ? | |
| | ENV7 | | | | |
| | ENV8 | | | | |
| Sustainability Appraisal Objectives | ENV9 | ++ | Proposals need to have regard to archaeology and other heritage assets. | ? | |
| bje | | | Land raising has design implications in terms | ? | |
| Isal O | ENV10 | + | of difference in height between adjacent plots/land holdings. | | Not having a policy may still mean that this is a consideration. That being said this is a new policy, |
| pra | ENV11 | | | | introduced to reflect practice that is ongoing in the |
| γAρ | ENV12 | | | | Broads and not addressed using current policies. It therefore seems prudent to address this issue in the Local |
| bilit | ENV13 | | | | Plan. As such, not having a policy was discounted. |
| aina | SOC1 | | | | |
| ust | SOC2 | | | | |
| | SOC3 | | | | |
| | SOC4 | | | | |
| | SOC5 | | | | |
| | SOC6ab | | | | |
| | SOC7 | | | | |
| | ECO1 | | | | |
| | ECO2 | | | | |
| | ECO3 | | | | |
| | ECO4 | | | | |

Another option could be a ban on land raising, but this seems unreasonable when the Publication version sets criteria for proposals to address – that is to say that land raising could be acceptable if certain criteria are adequately met.

Objectively Assessed Housing Need SA Assessment

Meeting need in Waveney and Central Norfolk HMA and working with Great Yarmouth to meet the need in that HMA option effectively comprises the following other policies. Please go to those assessments as well. The assessment below effectively summarises these individual policy approaches.

- Allocations at the Utilities Site (PUBNOR1), Pegasus site (PUBOUL3), Hedera House at Thurne (PUBTHU1) and land at Tiedam (PUBSTO1), Stokesby.
- Development Boundaries policy (PUBDM34)

Furthermore, the completions and permissions since April 2015 also count towards the OAN and this is set out in the Housing Topic Paper².

Some of the options rate as ?/-. It is important to note that there are other policies in the Local Plan that would provide a framework for determining planning applications if such a policy approach was adopted. That being said, the publication version approach does provide many positives.

| | | | Meeting need in Waveney and Central Norfolk Housing Market Areas and working with Great Yarmouth to meet | Mee | eting the entire need of the Broads in the Executive Area. | | higher OAN. Perhaps to enable ne delivery of more affordable Homes. | | A Lower OAN. Perhaps to reflect the environmental constraints of the area. | |
|-------------------------------|------|---|---|-----|---|-----|---|---|--|--|
| | ENV1 | + | the need in that HMA. Overall the approach taken in this local plan is positive. It places development in areas which have good access to services and facilities residents need and want to use (like schools, doctors and supermarkets). The same can be said with the development boundaries (as set out in the Settlement Study ³). Therefore residents have the opportunity to not use single occupancy car use. Stokesby rates negative on this score however as that village has very limited services. There is a topic paper ⁴ that sets out the reasons for allocating this site. Thurne also rates negative. | ?/- | Development boundaries and allocations direct housing to more sustainable locations. However, suitable land in sustainable locations in the Borough of Great Yarmouth is limited. This could lead to allowing housing in more rural parts of Great Yarmouth where there could be a need for more car journeys to access services and facilities (when compared to housing being located in an area with many services and facilities where there is a choice of transport modes). | ?/- | | + | | |
| | ENV2 | + | The locations for development are very likely to have mains sewage connection rather than rely on package treatments works and septic tanks. | ?/- | Some locations away from the main urban areas may not have mains sewage connections and therefore need to rely on package treatment works or septic tanks. | ?/- | | + | | |
| Objectives | ENV3 | + | Whilst all sites need to go through a HRA assessment at Plan Level at the very least, in general, the locations of the development boundaries and the allocations are within urban areas and not directly near to protected sites. | ?/- | Additional locations for development could be near protected sites. | ?/- | This would rate in a similar way to the second option of meeting the entire need of the Broads in the Executive Area. That is to say that there could | + | This could rate positive against the environmental criteria as it could result in | |
| Sustainability Appraisal Obje | ENV4 | + | Whilst assessment of landscape impacts and design responses will need to be addressed when schemes are designed, by have the allocations and development boundaries within urban areas, it could be that the impact on landscape character is minimal. | ?/- | Development boundaries and allocations direct housing to locations where development already exists. However developing land in other locations in the Borough of Great Yarmouth could have landscape impacts as the land could be prominent from the Broads and there could be isolated dwellings which also could impact landscape character. | ?/- | be pressure for development located in inappropriate areas of the Broads. That being said, there could be other areas in the Broads that are suitable. As such, it is uncertain. Please note that the Housing Topic Paper does address the potential to increase OAN to | + | less development bringing associated negative effects. However, it would rate negative against meeting the housing need of the population as well as supporting a flourishing economy as less houses would be planned for. | |
| | ENV5 | + | As per ENV1 assessment, the locations of development and development boundaries means that people do not have to rely on the private car. As such, overall +. Stokesby and Thurne however does not have the same types of services and facilities as the other allocations in the Local Plan. | ?/- | Development in other locations could lead to reliance on the private car. | ?/- | enable more affordable housing. | | | |
| | ENV6 | ? | Flood risk is an important issue to address in the Broads. The allocations however address the sequential and exceptions test ⁵ . With regards to the development boundaries, it can be seen that these encompass areas that are at risk of flooding. We asked stakeholders for their thoughts and this seems acceptable in the Broads as residential moorings are directed to development boundaries and by their very nature are located in waterbodies. | ?/- | The issue of flood risk is raised in the allocations and development boundary policies. However if the entire OAN were to be met, there could be pressure to allocate or develop areas that are at risk of flooding. | ?/- | | ? | | |
| | ENV7 | + | Generally positive as most allocations are on brownfield land. | ?/- | The policy directs to brownfield land which could be re-used for housing. | ?/- | | + | | |

Re | ENV1 By locating affordable housing in development boundaries which area areas with good facilities and high levels of access, there could be fewer car journeys when compared to locating dwellings in other locations. ENV2 Image: Stress of the | No Policy ? ? ? ? ? ? ? ? ? ? ? Not having a police does not mean that these issues will not be considered. There are some areas in the Broads suitable for windfall development because of the services and facilities that is nearby. A policy relating to development boundaries that | No change to DP22, HOR1, HOV1, OUL1, TSA5. These policies would score in a similar way to the Publication Local Plan. However the Publication version combines these five policies. There are some changes proposed to some of the development boundaries: The change to HOV1 removes car parks and thus protects them from development. This could be more positive in relation to tourism and the economy of the area as the car parking brings visitors to the area who spend money in the shops. The change to OUL1 adds an area of garden. This could be a more positive approach to delivery of housing as more land is in the development boundary. There is no change to the landscape impact as this area is screened by another garden. This could be more regative in relation to efficient use of land as garden land is not previously developed land. The change to HOR1 removes some areas of gardens that are prominent in the street and landscape. This could be more positive against efficient use of land as it removes some garden land from the development boundary. | The Settlement Study and Development Boundaries Topic Paper have assessed settlements and identified that there are some areas which are as sustainable as the four areas with development boundaries. There could be more areas available for residential development (so more positive against SCO4). However there are limited areas within the Broads part of the settlements for development (so by going with this policy the impact on landscape character could be negative). One area which was being considered as having a development boundary was Stalham Staithe. This area generally scored well in the Settlement Study. This scoring however relies on the ability to cross the A149 using the pedestrian refuge as many facilities and services are fairly close to the Staithe area once the A149 is crossed. Regarding the pedestrian refuge, the following organisations were contacted: Local businesses operating in the staithe: Consider the route important for visitors to the staithe area to visit the town. The refuge could be improved. The time taken to get to the town centre could be around 12 minutes or so. Norfolk County Council Highways initial opinion: refuge appears to be well used and there have been no reports incidents at the refuge in the last five years (although the absence of such accidents does not necessarily indicate a route is safe). While Staithe Road is suitable for two way traffic in peak tourist season, the pressure for tourist parking could restrict its width. The other roads are all primarily single track lanes with little or no passing provision and not ideally suited to any material increase in traffic movements. Parish Council – The pedestrian routes between the refuge and the staithe and to the town are both very well used particularly in the summer months with more visitors to the Broads. Consider that the routes need to be improved to make more obvious to drivers on the A149 and to pedestrians who could use it. Another consideration is the impact of | An option considered during the Issues and Options consultation was to reinstate the 1997 Local Plan approach of development boundaries applying to residentia and employment land uses. On reflection it was felt that this cou stifle the economy (therefore scoring negative against the economy objectives). That being said, access to these employmen sites by employees and visitors could be easier by a variety of modes in employment was directed to development boundaries (so positive against SCO6ab). There would likely be lo of exceptions e.g. boatyards and tourism development which coul result in a complicated policy. Th areas where the development boundaries are chosen are not necessarily appropriate for |

Gypsy and Traveller and Travelling Show People Need

The Needs Assessment (2017) concludes that there is not a Gypsy, Traveller and Travelling Showpeople need for the Broads Authority area. As such, no sites are allocated for this land use type. The Authority has a criteria based policy to assess such applications if they were to come forward. The lack of need rates as neutral against SOC4. If there was a need, this would rate positively against SOC4. In relation to the other SA objectives, the location and design of sites will be assessed against Policy PUBDM35: Gypsy, Traveller and Traveller and Travelling Show People which is assessed previously.

Policy PUBDM36: New Residential Moorings

Only some minor changes to the Preferred Options version which adds clarity to the policy. One change would rate more positive against ENV4 as this relates to ensuring that the associated residential paraphernalia is considered up front.

| | | | Publication version | | No Policy | No change to DP25 | | |

Gypsy and Traveller and Travelling Show People Need

The Needs Assessment (2017) concludes that there is a houseboat/residential mooring need for the Broads Authority area of 63. Sites are allocated later in the Local Plan for around 25 residential moorings. This leaves around 28 moorings to be found. As the Residential Moorings Topic Paper explains, to date, the Authority has undertaken the following tasks in relation to residential moorings:

- 1. Since 2011, there has been a policy to guide planning applications for proposals for residential moorings.
- 2. During the Publication stage of the Sites Specifics Local Plan (2014), a proposal for residential moorings at Brundall Gardens was put forward and subsequently included in that Local Plan.
- 3. A call for residential moorings was undertaken as part of the Issues and Options consultation in 2016. One site was submitted for consideration Hipperson's Boatyard which is assessed within this document.
- 4. Temporary planning permission was granted for ten residential moorings at Waveney River Centre to reflect supporting the viability of the business.
- 5. A second call for residential moorings, targeted at boatyards and marinas located in line with the adopted policy's location criteria was undertaken summer 2017. Nominations were received for residential moorings at Greenway Marine, Loddon Marina, Beauchamps Arms and Berney Arms⁶. These have all been assessed in this report.
- 6. The Authority also suggested, in the same letter, that those marinas or boatyards that do have people living on boats within them may wish to formalise this through the planning system. The Authority received one query with regards to information on how to receive planning permission for residential moorings in a boatyard.
- 7. The Development Management criteria based policy relating to residential moorings is to be rolled forward into the Local Plan.

By allocating sites for 25 residential moorings as well as undertaking a call for residential mooring sites on two occasions as well as having a criterion based policy to help determine applications the Authority has sought to meet its needs whilst ensuring the sites do not harm the special qualities of the Broads and are not in an isolated location.

Whilst not meeting the entire needs of residential moorings in the Broads could be a negative against SOC4, in order to protect the special qualities of the Broads, such sites need to be allocated in line with the criteria in PUBDM36.

The sites allocated for residential moorings are Brundall Gardens (BRU6), Hipperson's Boatyard (BEC2), Greenway Marine ((CHE1) and Loddon Marina (LOD1). These are assessed later in the SA.

The sites not allocated for residential moorings, which came forward as a result of the call for sites for residential moorings are Beauchamps Arms, Berney Arms and Waveney River Centre. Again, these are assessed later in the SA.

⁶ Please note that Loddon Marina, Beauchamps Arms and Berney Arms are owned by the same person. They were contacted in relation to Loddon Marina but decided to nominate the two pubs as well.

Policy PUBDM37: Permanent and Temporary Dwellings for Rural Enterprise Workers Only some minor changes to the Preferred Options version which adds clarity to the policy. No change to the assessment.

The |

Policy PUBDM47: Conversion of Buildings There are some minor changes to add clarification. No change to the assessment.

| | | | Publication version | | No Policy | No change to DP21 |
|-------------------------------------|--------|---|--|---|---|--|
| | ENV1 | + | Policy refers to the capacity of highway network as well as if outside development boundary, being in a sustainable location. | ? | | |
| | ENV2 | + | Policy seeks improved environmental performance of the building. | | | |
| | ENV3 | + | Policy refers to biodiversity. | ? | | |
| | ENV4 | + | Policy refers to positive contribution to the appearance of the locality. | ? | | |
| | ENV5 | | | | | |
| | ENV6 | | | | | |
| | ENV7 | + | Policy relates to conversion of buildings so using something that is already there. Policy seeks improved environmental performance of the building. | ? | | DP21 would score in a similar way to the Publication version. The Publication |
| es | ENV8 | + | By converting the building, there would be less waste from demolition. | ? | | version clarifies the difference between conversion inside and outside of the |
| ctiv | ENV9 | + | The policy refers to features that are worthy of retention. | ? | Not having a policy does not mean that these | development boundary. It also clarifies a |
| Dbje | ENV10 | + | The policy seeks high quality design. | ? | issues will not be addressed as part of | criterion about making a positive contribution to the landscape to make it worthy of retention (which could be more positive in relation to landscape and local distinctiveness as well as potentially heritage objectives). Other changes relate to highway capacity (so more positive in relation to ENV1 and |
| isal (| ENV11 | | | | conversion proposals. There are many | |
| prai | ENV12 | | | | buildings in the Broads that have the potential to be converted and with the special | |
| y Ap | ENV13 | | | | qualities of the Broads, it is prudent to have a | |
| bilit | SOC1 | + | Policy requires a structural survey to ensure building is safe. | ? | policy that seeks to emphasise their | |
| aina | SOC2 | | | | importance. As such, not having a policy was discounted | |
| Sustainability Appraisal Objectives | SOC3 | ? | The building may have features that rely on traditional skills such as thatching. | ? | uiscounteu | ENV6ab) and environmental performance (more positive against |
| | SOC4 | ? | If other uses are not feasible or viable, potential for residential. | ? | | ENV2 and ENV7). The publication version |
| | SOC5 | ? | If used for tourism or employment, would provide job opportunities. | ? | | is therefore preferred. |
| | SOC6ab | + | If outside development boundary policy refers to being in a sustainable location. | ? | | |
| | SOC7 | ? | The building could be run down and not used and therefore attract anti- social behaviour such as vandalism. | ? | | |
| | ECO1 | ? | If used for tourism or employment, would bring money into the area. | ? | | |
| | ECO2 | | | | | |
| | ECO3 | ? | If used for tourism or employment, would bring money into the area. | ? | | |
| | ECO4 | ? | Policy states that the building could be used for tourism. | ? | | |

Policy PUBDM48: Advertisements and Signs The changes add clarity in the main, but the addition of considering road, rail and water users results in a positive against ENV1 as below.

| | | | Publication version | | No Policy | No change to DP10 | | | |
|-------------------------------------|--------------|---|--|---|--|--|--|--|--|
| | ENV1 | + | Policy refers to impact on road, railway and water users. | ? | | | | | |
| | ENV2 | | | | | | | | |
| | ENV3 | | | | | | | | |
| | ENV4 | + | The policy seeks to minimise signing and protect the special qualities of the Broads. | ? | | | | | |
| | ENV5 | | | | | | | | |
| | ENV6 | | | | | | | | |
| | ENV7 | + | Policy seeks amalgamation with other existing signage. | ? | | | | | |
| | ENV8 | | | | | | | | |
| /es | ENV9 | + | Policy states that particular regard will be had to impact on conservation areas and heritage. | ? | | | | | |
| ectiv | ENV10 | + | Policy seeks well designed signage. | | Not having a policy does not mean that signage | | | | |
| Obj | ENV11 | | | | and adverts will have a negative impact on these | The general thrust of policy DP10 would | | | |
| isal | ENV12 | | | | issues. There is a need for signage in the Broads to | score in a similar way to the Publication version. There are some changes that | | | |
| pra | ENV13 | | | | reflect moorings, speed limits, business adverts | would score more positively against | | | |
| Sustainability Appraisal Objectives | SOC1 | | | | and so with the special qualities of the Broads and the desire to avoid poorly designed or a | heritage, landscape and design however. | | | |
| bilit | SOC2 | | | | proliferation of signs, a policy is prudent. As such, | The publication version is therefore | | | |
| aina | SOC3 | | | | not having a policy was discounted | preferred. | | | |

The sites discussed in the Topic Paper that have not been taken forward to the Local Plan are additional options. However, as these have not passed the tests in the Topic Paper, these are effectively unreasonable options and therefore not assessed.

Further areas could be allocated. Two calls for Local Green Space sites has been undertaken. A number of allocations have been received and assessed. It is not intended to complete a third call for sites. Furthermore, some important spaces are protected as Open Space.

| | ECO4 | | goods. | ? | | |

Policy PUBSSA47: Changes to the Acle Straight (A47T) Minor change to the Preferred Options version adds clarification. No change to assessment.

| | 0 | | Publication version | | No Policy | Allocate site for dualling |
|-------------------------------------|--------|---|--|---|---|---|
| | | | The policy seeks to emphasise the importance of the wider environment of the Broads | ? | | |
| | | + | and seeks to ensure these are considered as changes to the Acle Straight are planned | | | |
| | ENV1 | | and delivered. | | | |
| | ENV2 | + | The policy refers to water quality from surface water run-off. | ? | | |
| | ENV3 | + | The policy refers to biodiversity being an important consideration. | ? | | |
| | ENV4 | + | The policy emphasises the importance of impacts of change on the landscape. | ? | | |
| | ENV5 | | | | | |
| | ENV6 | + | The policy refers to surface water run off | ? | | |
| | ENV7 | + | The policy seeks that minimal amount of land possible is used to deliver changes. | ? | No policy does not mean | |
| | ENV8 | | | | that these issues will not | |
| ŝ | ENV9 | + | The policy emphasises that some assets could be affected by changes to the road. | ? | be addressed. But there | Such a policy would still set out criterial |
| tive | ENV10 | + | The design of any changes is essential to reduce any impact they could have to the area. | ? | is scope for changes to the road to come | similar to the Publication version so would |
| Sustainability Appraisal Objectives | ENV11 | + | Light pollution is emphasised in the policy. | | forward in the | rate the same. However, without an agreed |
| al O | ENV12 | | | | timeframe of this Local | scheme design it is not clear how much land is needed for any future dualling. Furthermore, |
| rais | ENV13 | | | | Plan. With this being the | dualling could not come forward in the plan |
| App | SOC1 | | | | only Trunk road that passes through the | period. Indeed the Publication version is wider |
| lity , | SOC2 | | | | Broads, it seems prudent | than solely dualling – it refers to changes to |
| iabi | SOC3 | | | | that there is a policy | the Acle Straight, including the safety improvements the Government have |
| tair | SOC4 | | | | which sets out the local | promoted for the road. As such, the |
| Sus | SOC5 | ? | One of the reasons for more significant changes to the road could be to improve journey times to benefit the economy. The policy does not stop changes to the Acle Straight, but sets out important issues which a scheme needs to consider. | ? | issues that need to be addressed. As such, not having a policy was discounted. | publication version is the preferred policy. |
| | SOC6ab | | | | discounted. | |
| | SOC7 | | | | | |
| | ECO1 | ? | See SOC5. | ? | | |
| | ECO2 | | | | | |
| | ECO3 | ? | See SOC5. | ? | | |
| | ECO4 | ? | On one hand the requirement for stopping places to enable people to appreciate the scenery could benefit tourism. Also any improvements in journey time that changes may bring could benefit tourists. But more significant changes to the road could change the landscape and views in the area which tourists enjoy. | ? | | |

8. Other sites put forward for consideration during the Preferred Options Consultation but not taken forward.

The following sites were put forward for consideration during the Preferred Options consultation or on discussions with Development Management Officers but on assessment (Housing and Economic Land Availability Assessment and Sustainability Appraisal) have not been included within the Publication Local Plan. Whilst the residential moorings sites have not passed the tests of the Topic Paper and therefore could be seen as unreasonable sites, they have still been assessed in the SA as there is a residential moorings need that the Local Plan seeks to meet.

| | Thunder Lane, Thorpe St Andrew Care home for elderly | Marina Quays Residential – market and holiday | | 21A Church Close, Chedgrave Market residential | Blackgate Farm, Great Yarmouth Gypsy and Traveller site | | Broadland Nurseries, Ormesby St Margaret Market residential | Land opposite Morrison's, Beccles Hotel |

These sites are not allocated in the Local Plan for the following reasons. Also see the HELAA, Residential Moorings topic Paper and Towards allocations - Housing and Economic Land Availability Assessment which can all be found here: http://www.broads-authority.gov.uk/planning/planning-policies/development/future-local-plan/evidence-base2

Thunder Lane, Thorpe St Andrew

Scores negatively against many objectives in the Sustainability Appraisal.

Marina Quays

Much uncertainty around the impacts of this development. Scores negatively against flood risk.

21A Church Close, Chedgrave

Much uncertainty around the impacts of this development. Scores negatively against greenfield land. Objectively Assessed Housing Need for the Broads Authority part of Central Norfolk Housing Market Area met and exceeded so no need to allocate this garden site.

Blackgate Farm, Great Yarmouth

Flood risk is the main concern here. There could be more suitable areas in other parts of the Borough to allocate land for permanent Gypsy and Travellers.

Broadland Nurseries, Ormesby St Margaret Scores negatively against many objectives in the Sustainability Appraisal.

Land opposite Morrison's, Beccles Scores negatively against many objectives in the Sustainability Appraisal.

Beauchamps Arms and Berney Arms Scores negatively against transport and roads and access to facilities.

Waveney River Centre Scores negatively against access to services and facilities.

Page 156 of 203

9. Cumulative effects of the Publication Local Plan

This matrix identifies the impacts of the Local Plan policies on the various SA Objectives, taken as a whole.

Please note that this table does not include assessment of the vision, the housing or residential mooring numbers and not the specific Local Green Space and Open Space allocations that are related to the relevant policies. It is simply a matrix of the policies.

The objectives with the most positives (more than 40) relate to:

- Traffic
- Water quality and efficiency
- Biodiversity and geodiversity
- Landscape
- Sustainable resources
- Heritage
- Design
- Health
- Tourism

The objectives with negatives are access to services and facilities, greenfield land and housing delivery.

The objectives with the least positives (less than 10) relate to:

- Coastal change
- Renewable energy
- Poverty and inequality
- Waste

Page **159** of **203**

10.Other effects of the Publication Local Plan

Within the individual tables themselves, there are other effects identified and discussed.

Short, medium and long term effects

S - Short term – 0-5 years. M - Medium term – 5-15 years. L - Long term – beyond 2036

Permanent and Temporary

P – permanent. T - temporary

Secondary Effects

These effects arise not as a direct result of the policy, but occur away from the original effect or as a result of a complex pathway.

Synergistic Effects

These are effects that interact to produce a total effect greater than the sum of the individual effects.

Maximise positives and mitigate negatives

Noe that some policies have been rolled forward from existing adopted planning policy documents and some have been amended in order to maximise the benefits in particular.

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|---|---|--|--|--|--|---|
| Policy PUBSP1: DCLG/PINS Model Policy | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Not topic specific so has n effects, secondary effects effects but depends on th being determined using th relevant linked DM policy related DM policy. | and synergistic e specific scheme nis policy. See | None identified. | No specific monitoring indicator for this policy. Depending on type of development, other policies and their indicators will be of relevance. |
| Policy PUBDM1: Water Quality and Foul Drainage | Water quality can improve within a few years of the source of pollution being removed. | Intended to be permanent. | Good water quality not or biodiversity but also conti visitors. | - | Refer specifically to types of waste water infrastructure. | Applications involving sewage treatment works and what type of system used. |
| Policy PUBDM2: Boat wash down facilities | This policy does not rectify what has happened in the past, but seeks to reduce the impact in the future. So Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Boats could be moved to o than the Broads. Boats co Broads and then into othe protect those from any iss versa. | ming out of the r waterways could | None identified. | Boat wash down areas and filtration devices delivered as a result of relevant planning applications. |
| Policy PUBDM3: Water Efficiency | Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Whilst housing developme Broads is small when com Authorities, by being wate less need for extraction w energy savings and potent habitats from where wate | pared to other er efficient there is ith associated tially less impact on | Specify water efficiency levels. | Dwellings permitted at 110 l/h/d. Non-residential buildings achieving 50% on the BREEAM water calculator. |
| Policy PUBSP2: Strategic Flood Risk Policy Policy PUBDM4: Development and Flood Risk | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Policy emphasises that It i make flood risk worse else | • | None identified. | Permissions granted contrary to Environment Agency Flood Risk advice. |
| Policy PUBDM5: Surface water run- off | Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | SuDS contribute to a netw Infrastructure which bene wildlife. They are a response to see flood risk worse elsewher surface water run-off, also quality as pollutants could water. | fits people and eking to not make e. By addressing o addresses water | None identified. | SuDS delivered in line with the hierarchy. |
| Policy PUBDM6: Open Space on land, play, sports fields and allotments | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Contributes to a network Infrastructure which bene wildlife. Enables healthy lifestyles. Permeable so allows wate than run off thus not cont | fits people and r to infiltrate rather | None identified. | Open space lost. Open space delivered in line with the policy. |
| Policy PUBDM7: Green Infrastructure | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Contributes to a network Infrastructure which bene wildlife. | | None identified. | Green Infrastructure lost. Green Infrastructure delivered in line with this policy. |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|---|---|--|--|---|--|---|
| Policy PUBSP3: Climate Change | Reducing emissions (mitigating) – an individual's reduction on their own will not have a major impact on climate change, but collectively, there can be impacts beyond thirty years or so as we are 'locked in' to the scenario that will arise over the coming few decades. | Intended to be permanent. | By walking rather than g less energy, not only will and resources saved but money. | emissions be reduced | None identified. | Planning applications in accordance (or otherwise) with this policy. |
| Policy PUBDM8: Climate Smart Checklist | Adapting - Effects can be felt from the short term after policy used to inform/determine relevant applications. But the policy emphasises the need to look long term to see what the effects could be. | | | | | Development proposals that have adequately completed the checklist. |
| Policy PUBSP4: Soils | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy | Intended to be permanent. | Similar effects as the Pea seeks the efficient use of | | None identified. | Planning applications in accordance (or otherwise) with this policy. Number of planning approvals leading to permanent loss of 'best and most versatile' (BMV) agricultural land' |
| Policy PUBDM9: Peat soils | used to inform/determine relevant applications. | | Policy has many effects: Climate change through sequestration of carbon. Preserving archaeology a palaeoenvironment Benefitting water quality | and the | | Development on areas of peat permitted in line with this policy. |
| Policy PUBS56: Historic Environment and Policy PUBDM10: Heritage Assets | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Benefitting biodiversity Maintains a link, knowledge and appreciation to the past. | Such assets are an attraction in the area (on their own and in combination) | None identified. | Heritage at risk Archaeological field evaluations 'Unknown' assets identified. Applications with an interpretation |
| Policy PUBDM11: Re-use of Historic Buildings | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Bringing an asset into use the past. Can also save e materials and building al as realising the embodie building. Provides space for example with wider b economy through the su | nergy from using ready in place as well d energy of the for use by businesses penefits to the | None identified. | element. Heritage assets re- used. Applications granted contrary to Historic Environment Manager advice. |
| Policy PUBSP6: Biodiversity Policy PUBDM12: Natural Environment | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Such assets are an attrac Biodiversity provides ma For example, a larger numer means a greater variety of species diversity ensures for all life forms. Healthy better withstand and rec disasters. | ny varied benefits. mber of plant species of crops. Greater natural sustainability ecosystems can | None identified. | Brownfield sites with high environmental value and how incorporated in schemes. Biodiversity and geodiversity features incorporated into schemes. Planning Application Habitat Regulation Assessments completed to an acceptable quality. Applications permitted against the advice of Natural England. |
| Policy PUBDM13: Energy demand and performance | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Not only reduces carbon running costs of the hom | | With many historic buildings, refer to energy performance and historic buildings. | Relevant schemes meeting 10% of predicted energy requirements as per the hierarchy. Non-housing schemes meeting BREEAM very good standard |
| Policy PUBDM14: Renewable Energy | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are | Permitted schemes will or energy needs of the pop carbon emissions. | | Developer to remove equipment when redundant to limit landscape impact. | Renewable energy development type and scale |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|--|---|--|--|---|---|--|
| | | permanent and any negative effects are temporary. | | | | |
| Policy PUBSP7: landscape Character Policy PUBDM15: Development and Landscape | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | A graphic showing what means is at the end of th | - | None identified. | Applications permitted contrary to Landscape Architect advice. |
| Policy PUBDM16: Land Raising | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | See graphic above re lan Flood risk can be made v raising land. | | None identified. | Applications permitted contrary to Landscape Architect advice. Applications permitted contrary to Tree Officer advice. |
| Policy PUBDM17: Excavated material | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Ensures waste material disposed of in appropriate way and seeks to ensure this is planned at the start of the scheme rather than afterwards. | None identified. | None identified. | Planning applications in accordance with the disposal hierarchy. |
| Policy PUBDM18: Utilities Infrastructure Development | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Still enables utilities infrastructure with associated benefits such as mobile phone coverage, gas and electricity supply. | Such infrastructure is part of a network. | Policy is relevant to all utilities infrastructure. | Planning applications in accordance (or otherwise) with this policy. |
| Policy PUBDM19: Protection and enhancement of settlement fringe landscape character | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | See graphic above re lan | dscape. | None identified. | Applications permitted contrary to Landscape Architect advice. |
| Policy PUBDM20: Amenity | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Amenity policy benefits of people. Can also contr an area. Considering amo can prevent expensive re | ribute to tranquillity of enity issues early on | Refer to other amenity issues such as vermin. | Applications refused on amenity grounds. |
| Policy PUBDM21: Light pollution and dark skies | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Reduces energy costs, do and benefits wellbeing th Can be an attraction to t | hrough tranquillity. | None identified. | Lighting schemes in accordance with zone the application is located in. |
| Policy PUBSP8: Getting to and around the Broads | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Will enable visitors to an Broads and contribute to sustainable modes of tra health benefits as well as pollution and carbon. | o the economy. More Insport can have | None identified. | Parking areas provided as part of relevant |
| Policy PUBSP9: Recreation access around the Broads | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Will enable visitors to en here. Part of the attraction well. Paths etc. are part of Infrastructure network. | ons to the area as | None identified. | applications/schemes. Schemes permitted contrary to Highways Authority advice. Schemes permitted contrary to Highways England advice. Changes to the PROW |
| Policy PUBDM22: Transport, highways and access | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | More sustainable modes health benefits as well as pollution and carbon. Sa consideration in relation | s emit less air fety is an important | Ensure potential future routes are not compromised by development. | network. Launch facilities for small craft gained or lost. Travel Plans produced. |
| Policy PUBDM23: Recreation Facilities Parking Areas | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any | Could help to ensure the bringing more visitors to the economy. | - | Address light pollution as could be in isolated areas. | |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |

| Policy PUBDM27: Development on Waterside Sites. | | | | | None identified. | |
| Policy PUBSP12: Sustainable Tourism | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Generally the policy seel impacts felt on the speci Broads as a result of any would be many varied se synergistic effects relate | al qualities of the schemes. So there condary and | None identified. | Tourism development located as set out in policy |
| Policy PUBDM28: Sustainable Tourism and Recreation Development | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | qualities of the Broads. N been discussed elsewher specific DM policy relatir example landscape, biod run off) | Many of which have re in relation to the ng to that quality (for | None identified. | Tourism land use Provision of new holiday accommodation. Holiday accommodation changed to permanent |
| Policy PUBDM29: Holiday Accommodation – New Provision and Retention | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | The lifetime of homes, in relation to flood risk in the NPPG, is 100 years | Provides accommodation for visitors. Benefits local economy and supply chain. | Network of holiday accommodation around the Broads. | None identified. | residential use. |
| Policy PUBSP13: Navigable Water Space | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine | Intended to be permanent. | Would benefit users of the individuals and business | | None identified. | |
| Policy PUBDM30: Access to the Water | relevant applications. Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | continues to be a top att water which benefits her users as well as the local | raction for fun on the alth and wellbeing of | Ensure do not impact navigation. | 2/10% moorings delivered on site/off site contributions. Moorings provided – type and in line with |
| Policy PUBDM31: Riverbank stabilisation | Effects felt from the short term after policy used to inform/determine relevant applications. | The effect would depend on the type of stabilisation used and if it were maintained well. Different methods have different lifetimes and need different maintenance regimes. | Other than stabilising riverbanks, the method chosen can benefit biodiversity or landscape character. | The policy applies all around the Broads and therefore the benefits could materialise around the entire system. | Refer to guidance. Mention maintenance. | guide. Riverbank stabilisation provided – type and in line with guide. Provision for launching of small vessels. Schemes permitted deemed to have |
| Policy PUBSP14 Mooring Provision | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Enables people to enjoy the Broads from the water. Can provide an income to some organisations. | Moorings are part of a network around the Broads so boats can travel around knowing there is somewhere to moor. | None identified. | significant impact on navigation |
| Policy PUBDM32: Moorings, mooring basins and marinas. | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | | | Refer to guidance. Clarify what type of moorings the 2/10% element of the policy relates to. | |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|---|---|---|--|--|---|--|
| Policy PUBSP15: Residential development | Housing is intended to be delivered within the Local Plan period (2036). Effects felt from the short term after policy used to inform/determine relevant applications. | The lifetime of homes, in relation to flood risk in the NPPG, is 100 years. | Enabling market housing housing in certain schem housing need of the wide area. Meets the Governn home delivery. | es. Contributes to the er housing market | None identified. | |
| Policy PUBDM33: Affordable Housing | Housing is intended to be delivered within the Local Plan period (2036). Effects felt from the short term after policy used to inform/determine relevant applications. | Affordable housing will provide benefits for as long as it is affordable housing. There is however the right to buy scheme. That being said, a particular house that changes from affordable to market is still providing for a need. The lifetime of homes, in relation to flood risk in the NPPG, is 100 years. | Such homes provide som with suitable accommod cost to them. There will b wellbeing at the very leas to their lives. | ation at an acceptable be benefits to their | None identified. | Number of dwellings delivered. Development in line with spatial strategy. Affordable housing delivered. Development within development boundaries. |
| Policy PUBDM34: Residential Development within Defined Development Boundaries | Effects felt from the short term after policy used to inform/determine relevant applications. | The lifetime of homes, in relation to flood risk in the NPPG, is 100 years | By ensuring residential d near to services and facil reduced trips by motor v run or to see the GP for e could be more financially located in these areas in example, the opening co highway or sewerage net services could already be | ities, there could be ehicles for the school example. A scheme viable by being relation to, for sts (linking to the twork) as facilities and | None identified. | |
| Policy PUBDM35: Gypsy, Traveller and Travelling Show People | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | The various criteria address the special qualities of the Broads as well as the likely needs of the user of the site. There will be many varied secondary effects depending on the final scheme. | Sites are part of a network around the country enabling Gypsy and Travellers to move around and have somewhere to stay. | None identified. | Gypsy and Traveller and Travelling Show People sites delivered in line with this policy. |
| Policy PUBDM36: New Residential Moorings | Effects felt from the short term after policy used to inform/determine relevant applications. | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | Whilst living on boats is a can still help to meet peo needs. It can be a more a By ensuring these are loo and facilities, there could motor vehicles for the sc GP for example. | ople's accommodation affordable way to live. sated near to services be reduced trips by | None identified. | Provision of residential moorings in line with this policy. |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|---|---|---|---|---|--|---|
| Policy PUBSSTRI: Trinity Broads Policy PUBSSUT: Upper Thurne | Effects will be felt in the short term and intended to last for the long term. | The area could change but proposals are required to meet the aims of the policy. Towards permanent. One of the main reasons this area is tranquil is Potter Heigham Bridge which is a Scheduled monument. This prevents larger boats heading towards the Upper Thurne because of the low air draught. | - By maintaining the tranquillity of the area, there could be benefits for the wildlife in the area. | These two policies are similar in their approach and when combined provide a large area of the Broads which is tranquil in nature for people and wildlife to get away from it all. | Maximise the positive effects of the current policy by extending the thrust of the policy to the built up areas. | Planning applications in accordance (or otherwise) with this policy. |
| Policy PUBSSCOAST: The Coast | The policy is in conformity with the Shoreline Management Plan. According to the Shoreline Management Plan, in the short and medium, term the present defences are to be maintained while a retired line option is fully investigated in terms of its social, economic and environmental consequences. | | The policy is in conformity with the Shoreline Management Plan for the entire area which relates to the approach to coastal erosion. | | None identified | Planning applications in accordance (or otherwise) with this policy. |
| Policy PUBSSROADS: Main road network | This depends on if and when applications that can impact highways come forward. The effects can be from short to long term. | Roads can change to reflect how they are used and any safety issues. Whilst the route maybe permanent, perhaps the actual road provided can be temporary. | The economy of the area could benefit from a smooth running highway network. | | None identified | Schemes permitted contrary to Highways advice. |
| Policy PUBSSMILLS: Drainage Mills | This depends on if and when applications for changes to mills come forward. The effects can be from short to long term. | If mills are restored, it is envisaged this will be permanent. | The mills could become more of an attraction for the area. | The landscape could change if mills are restored. This would be a positive change. | None identified | Mills brought back into use. Changes to mills in line with this policy. |
| Policy PUBSSPUBS: Waterside Pubs Network | Effects will be felt in the short term. Policy seeks to retain in long term use. Further benefits could arise from changes that the policy permits but there is no set time line or guarantee of improvements. Whilst the policy may protect the pubs, change could still occur. | | Waterside pubs can benefit the wider economy through supply chains. | The pubs together are a network of pubs around the Broads benefiting the community and visitors alike. | Rather than just allocating the pubs for protection, the policy promotes appropriate change. | Improvements to pubs in line with policy. Pubs lost from public house land use. |
| Policy PUBSSSTATIONS: Railway stations/halts | It is intended that the effects from the policy will be felt from the short term and last for the long term. Does allow certain changes but there is no time line. | It is intended that the halts and improvements will be permanent. | Visitors and workers (those using the trains that stop at these halts) originate elsewhere. They can spend money etc. at that origin as well as the destination. | The stations are part of a network of rail halts. | Rather than just allocating the halts for protection, the policy promotes appropriate change. | Improvements to stations in line with policy. Stations lost to other uses. |
| Policy PUBSSTRACKS: Former rail trackways | The effects will materialise if and when routes are developed. There is no set time frame for delivering the sites. Once in place, the effects are likely to be long term/permanent. | | These trackways, if delivered, can bring more people to the area which could benefit the local economy. | | The positives of the original policy are maximised by including three areas (the original include one area only) | Recreation routes delivered on these schemes. Development that encroaches onto these trackways. |
| Policy PUBSSLGS: Local Green Space | Effects will be felt in the short term. Allocation intended to be permanent (and long term), but the NPPF states that change can happen if under very special circumstances. | | Being maintained as open space allows these areas to contribute to a network of Green Infrastructure which benefits people and wildlife. | | None identified | Local Green Spaces lost/negatively affected by development. |
| Policy PUBSSSTAITHES: Staithes | Note that the policy seeks to protect what is in place now/what the situation is now. Effects felt from the short term after policy used to inform/determine relevant applications. | Intended to be permanent. | Benefit economy through enabling the loading and unloading of goods. | | None identified. | Staithes lost/negatively affected by development. |
| Policy PUBSSA47: Changes to the Acle Straight (A47T) | Some changes could occur in the short and medium term, but larger scale changes are likely to be felt (as the scheme is delivered) beyond 2036. Effects felt from the short term after policy used to inform/determine relevant applications. | | Policy allows change that meets certain criteria. It is intended that the resultant scheme has positive effects which are permanent and any negative effects are temporary. | | Generally the policy seeks to minimise the impacts felt on the special qualities of the Broads as a result of any schemes. So there would be many varied secondary and synergistic effects related to the special qualities of the Broads. Many of which have been discussed elsewhere in | Changes to A47 in line with this policy. |

| Policy | Short / medium / long term effects | Permanent/ Temporary | Secondary Effects | Synergistic Effects | Mitigating negatives / maximising positives | Monitoring Indicator |
|--------|---------------------------------------|----------------------|-------------------|---------------------|--|----------------------|
| | | | | | relation to the specific DM policy relating to that quality (for example landscape, biodiversity, surface water run off) | |

11.Likely Situation without a Plan

Whilst the NPPF would provide policy guidance, the following issues could arise if there was not a Local Plan with these policies within it:

- Moorings and riverbank stabilisation are not considered in the NPPF, so there would be a policy gap relating to these infrastructure types which are essential in the Broads.
- Living on a boat is not covered in the NPPF. There are many people who live on a boat in the Broads and the policies relating to residential moorings are therefore important for those people as well as to protect the special qualities of the Broads.
- How the housing need of the Broads is tackled is a detailed local issue. So the locally set development boundaries and housing allocations are important to address housing need whilst ensuring the special qualities of the Broads are protected.
- Various sites are allocated for various uses to reflect the local characteristics. Without these policies, the NPPF would not provide the level of detail that is important for those sites.
- In general, the detail of the policies reflects the identified special qualities of this nationally important landscape.

It can therefore be concluded that without this local plan the special qualities of the Broads could be at risk through inappropriately designed and inappropriately located development.

Appendix A: Sustainability Appraisal Objectives – Focussed consultation

The consultation ran from 29 April to 27 May 2016. Extracts from the consultation letter and comments received follow. The following organisations were invited to comment: Environment Agency, Historic England, Natural England, our district and county councils, RSPB, New Anglia LEP, Wild Anglia and Marine Management Organisation.

Which SA Objectives would we like to change?

SOC6: To improve the quality, range and accessibility of community services and facilities. ENV10: To achieve the highest quality of design that is innovative, imaginable, and sustainable and reflects local distinctiveness.

Why do we want to change the SA Objectives?

After using the SA Objectives at the first stage of producing the Local Plan and also using them in relation to assessing flood risk, it has become apparent that two of the SA Objectives could be improved to be clearer in their wording as well as more consistent with the NPPF. In particular SOC6 as worded could only be applied to the provision of new services rather than assessing the location of a site and its accessibility to existing services.

What are the changes?

ENV10: To achieve the highest quality of design that is innovative, *imaginative*, and sustainable and reflects local distinctiveness.

SOC6a: To improve the quality, range and accessibility of community services and facilities

SOC6b: To ensure new development is sustainability located with good access by means other than a private car to a range of community services and facilities.

Comments received:

The comments received are on the following page.

| Organisation | Comment | Broads Authority Response |
|-----------------------------------|--|---|
| Natural England | No comments | Noted. |
| Norfolk County Council | Support changes. | Support noted. |
| North Norfolk District Council | It is the decision making criteria that are important in the applying the objective and it is felt that there is no need to split Objective SOC6 into two separate objectives. In doing so you are making the SA objectives very specific and perhaps limit. Overall from the appendix 5 in the scoping report it can be seen that the decision making criteria / prompting questions adequacy cover accessibility and cover this specific point. | The decision making criteria do allow for the accessibility objective to be interpreted both ways – i.e. is it a new service that is located in a sustainable location or is the allocation for, say, dwellings in a location well related to services? But the SA Objective itself when read literally only relates to improving the accessibility of a service or improving the range. We do not think this is limiting as whilst there are two SA objectives number 6, the decision making criteria are the same and indeed they will be assessed together but one will apply to new service provision and another will apply to new dwellings. The Authority considers this change makes the objectives (on considering other comments |

| Organisation | Comment | Broads Authority Response | |
|-------------------------------|--|---|--|
| | | received). | |
| | In relation to changes to ENV10 – this is a correction to grammar, although if given a preference there is a case for just delating any reference to using ones "imagination" and leaving the objective as … <i>'innovative, sustainable and reflects local distinctiveness'</i> as innovation implies imagination. | We consider that 'imaginative' is a relevant aim for development in the Broads. The synonyms for innovation and imagination tend to be different. Whilst technical innovation is important; so too is creativity. As such, we intend to keep this as the SA Objective (on considering other comments received). | |
| Broadland District Council | No comments other than bringing your attention to a typo on SOC6b – "sustainably" not "sustainability" | Error noted and final changes will be checked thoroughly. | |
| Historic England | Historic England supports the amendment to SA objectives ENV 10 which is of relevance to Historic England's primary duty to consider the impact of proposals on the historic environment. ENV 10 is directly related to cultural heritage, aesthetic values and sense of place. This is acknowledged in the related ecosystems services as reported in appendix 3 of the issues and options sustainability appraisal. The deletion of <i>'imaginable'</i> and its replacement by <i>'imaginative'</i> allows for a more focused assessment of the likely significant effects that may arise from decisions made on the emerging Local Plan. As the ultimate policies that result will require a precision of language, then this new wording is deemed an improvement and will assist in the delivery of the sustainability appraisal that will inform the pre-submission Local Plan. | | |

The Publication Local Plan SA (2017) has reviewed these documents:

<u>Neighbourhood Planning Act (2017)</u>

The Act includes provisions intended to strengthen the role of neighbourhood planning, including requirements that decision-makers take account of "well-advanced" neighbourhood plans, and that such plans have full legal effect once they have passed a referendum.

The act also includes new powers for the government to direct two or more local planning authorities to develop joint plans, and powers for county councils to prepare plans where districts have not done so.

In addition, the new legislation includes restrictions on powers to impose planning conditions, including tightening rules around local authority use of pre-commencement conditions by ensuring only those with written agreement from the developer can be used.

The act also includes provisions intended to improve the operation of compulsory purchase orders by clarifying case law that determines compensation for landowners.

Housing White Paper (2017)

The white paper "Fixing our broken housing market" sets out a broad range of reforms that government plans to introduce to help reform the housing market and increase the supply of new homes.

For local authorities: the Government is offering higher fees and new capacity funding to develop planning departments, simplified plan-making, and more funding for infrastructure. They will make it easier for local authorities to take action against those who do not build out once permissions have been granted. They are interested in the scope for bespoke housing deals to make the most of local innovation. In return, the Government asks local authorities to be as ambitious and innovative as possible to get homes built in their area. All local authorities should develop an up-to-date plan with their communities that meets their housing.

For private developers, the Government is offering a planning framework that is more supportive of higher levels of development, with quicker and more effective processing and determination of planning applications, and is exploring an improved approach to developer contributions. In line with the industrial strategy, the Government will boost productivity, innovation, sustainability and skills by encouraging modern methods of construction in house building. The Government will encourage greater diversity of homebuilders, by partnering with smaller and medium-sized builders and contractors in the Accelerated Construction programme, and helping small and medium-sized builders access the loan finance they need. In return, the Government expects developers to build more homes, to engage with communities and promote the benefits of development, to focus on design and quality, and to build homes swiftly where permission is granted. Critically, the Government also expect developers to take responsibility for investing in their research and skills base to create more sustainable career paths and genuinely bring forward thousands of new skilled roles.

• North Norfolk Retail and Main Town Centres Uses Study Final Report (2017)

Of Relevance is the Hoveton Town Centre references as follows:

- Hoveton Town Centre is classed as a Medium Town Centre in the emerging North Norfolk District Council Local plan.
- Town centre is dominated by Roys.
- Town Centre extends to near to the river and riverside area.
- In relation to shopping patterns for comparison goods, Hoveton Town Centre has a low retention rate and much leakage to Norwich. For convenience goods, there is reasonable retention.
- Hoveton is trading below benchmark levels, which suggest existing floorspace can absorb future expenditure growth.
- The provision of class A3/A5 is strong in Hoveton. Hoveton/Wroxham has high provision of Class A3 restaurants/cafés reflecting its tourist role, but a below average provision of Class A4 pubs/bars compared with the national average.
- Shop vacancy rate is low.
- Waveney District Council: Retail and Leisure Needs Assessment (2016)

The market towns and District Centres (Kirkley and Oulton Broad) fall within the defined catchments of larger shopping centres and serve more localised catchments, although they do also function to varying degrees as important tourist and visitor destinations (particularly Southwold).

Oulton Broad is divided into two parts with the southern end being set back from the street across the bridge by Oulton Broad and the other being located on a busy stretch of linear high street, with the majority of units on the eastern side of the street.

The centre is anchored in the south by a Spar convenience store. Other occupiers in this part of the centre include several restaurants/cafes, a public house and a gift shop. There is a large vacant wine bar that is located on the high street to the north of the centre. Although the south of Oulton Broad is smaller and not as busy, it is likely to have increased levels of seasonal trade due to the proximity of the Broads.

The northern side includes a small parade of shops, with occupiers including a beauty clinic and carpet shop. In regards to a convenience offer, there is a small Premier store. Similarly to Kirkley, there is a gap in financial services, particularly banks and building societies. However there is a public library located to the north of the centre.

Oulton Broad has 54 units.

<u>Central Norfolk Strategic Housing Market Assessment (2017)</u>

The Central Norfolk Strategic Housing Market Assessment (CNSHMA):

- Identifies the total amount of housing needed (Objectively Assessed Need or OAN) in the Housing Market Area (HMA). The Central Norfolk Housing Market Area covers Norwich, Broadland, South Norfolk, North Norfolk and Breckland Council areas.
- This study also calculates the OAN for the Waveney and Great Yarmouth Council parts of the Broads Executive Area.
- Covers the period from 2015 to 2036.

The process for developing OAN is now a demographic process to derive housing need from a consideration of population and household projections. To this, external market and macro-economic constraints are applied ('Market Signals') in order to embed the need in the real world.

The first CN SHMA was produced in 2016. This 2017 CNSHMA takes into account the 2014 Government household projections and provides an up to date Objectively Assessed Housing need for the Broads Authority.

This replaces the 2016 version and reflects more up to date population projections. The updated Objectives Assessed Housing Need for the Broads is as follows:

Figure 81: Projected Dwellings needed for the Broads by Local Authority: policy-off, excluding the City Deal (Note: Dwelling

numbers derived based on proportion of dwellings without a usually resident household in the 2011 Census. Note: figures may not sum due to rounding)

| ORS Model Using Long-term migration trends | 0 | 50 | 70 | 3 | 40 | 66 | 57 |

Broads Plan (2017)

The Broads Plan is the Management Plan for the Broads and was adopted in 2017. The Broads Plan is the single most important strategy for the Broads. It sets out a long-term vision for the area, and shorter-term actions to benefit the environment, local communities and visitors. As a high level, overarching document it draws together and guides a wide range of partnership plans, programmes and policies relevant to the area. The Broads Plan is reviewed and updated on a regular basis. This plan covers the period 2017-2022. There are elements of the plan that relate to businesses, employment and the economy and these are as follows:

- The hire boat industry, while experiencing a gradual decline in boat numbers since 2010, remains a significant part of the Broads economy.
- Angling is another major contributor to the local and regional economy, and the Broads offers some of the best coarse fishing in England.
- One long term aim is that the hire boat industry, while experiencing a gradual decline in boat numbers since 2010, remains a significant part of the Broads economy.
- Another long term aim is that angling is another major contributor to the local and regional economy, and the Broads offers some of the best coarse fishing in England.
- 'Climate smart' planning and action is helping to retain the beauty and value of the Broads as a special place of high quality landscape, wildlife and heritage that provides people with opportunities
- for recreation, learning, wellbeing, employment and economic sustainability is another aim.
- Tourism is a major product in the local economy of the Broads National Park and wider economy of the East of England, bringing in nearly £600m a year and supporting more than 7200 jobs (full-time equivalent). The attractions of the Broads also recognise the significant appeal of the surrounding area. This includes the historic city of Norwich, the bustling market towns of Beccles and Bungay in the Southern Broads, the popular seaside resorts of Great Yarmouth and Lowestoft, and the sweeping stretches of the North Norfolk coast, part of which is designated as an Area of Outstanding Natural Beauty.
- Globalisation, new legislation and management expectations are putting pressure on farming businesses, and many have to diversify to survive.
- Norfolk Strategic Framework (Consultation Draft 2017).

In early 2015 the Norfolk Local Planning Authorities, working through its strategic planning member forum, agreed to formally cooperate on a range of strategic cross-boundary planning issues through the preparation of this Norfolk Strategic Framework. The aim of producing the framework is to:

- Agree shared objectives and strategic priorities to improve outcomes for Norfolk and inform the preparation of future Local Plans;
- Demonstrate compliance with the duty to co-operate;
- Find efficiencies in the planning system through working towards the establishment of a shared evidence base;
- Influence subsequent high level plans (such as the Strategic Economic Plan); and
- Maximise the opportunities to secure external funding to deliver against agreed objectives.

This assessment shows how the Local Plan meets each of the draft agreements. At the time of writing, the NSF was out for an 8 week consultation.

An assessment of how the Local Plan addresses each Agreement can be found in the Duty to Cooperate Statement out for consultation alongside this SA.

• Biodiversity Enhancements guide (2016)

The Biodiversity Enhancements guide provides information, images and further links on different types of wildlife enhancements that could be provided as part of schemes. The enhancements range from bird and bat boxes, to log piles and ponds. This guide was adopted by the Authority on 18 November 2016.

• Waterside Bungalows and Chalets guide (2016)

This describes the history of the bungalows properties as well as discusses their importance. In part two, it discusses changes that are often proposed for waterside bungalows/chalets ranging from new windows and extension to total replacements. This guide was adopted by the Authority on 18 November 2016.

• Building our Industrial Strategy Green Paper (consultation ended April 2017)

This green paper sets out the Government's approach and some early actions they have committed to take. The objective of our modern industrial strategy is to improve living standards and economic growth by increasing productivity and driving growth across the whole country. We identify 10 pillars we believe are important to drive forward our industrial strategy across the entire economy: science, research and Summary 10 Building our Industrial Strategy innovation; skills; infrastructure; business growth and investment; procurement; trade and investment; affordable energy; sectoral policies; driving growth across the whole country; and creating the right institutions to bring together sectors and places. These pillars frame our approach, and across each of them we set out a programme of new policy.

The pillars

- 1. Investing in science, research and innovation we must become a more innovative economy and do more to commercialise our world leading science base to drive growth across the UK.
- 2. Developing skills we must help people and businesses to thrive by: ensuring everyone has the basic skills needed in a modern economy; building a new system of technical education to benefit the half of young people who do not go to university; boosting STEM (science, technology, engineering and maths) skills, digital skills and numeracy; and by raising skill levels in lagging areas.
- Upgrading infrastructure we must upgrade our standards of performance on digital, energy, transport, water and flood defence infrastructure, and better align central government infrastructure investment with local growth priorities.
- 4. Supporting businesses to start and grow we must ensure that businesses across the UK can access the finance and management skills they need to grow; and we must create the right conditions for companies to invest for the long term.
- 5. Improving procurement we must use strategic government procurement to drive innovation and enable the development of UK supply chains.
- Encouraging trade and inward investment government policy can help boost productivity and growth across our economy, including by increasing competition and helping to bring new ways of doing things to the UK.
- Delivering affordable energy and clean growth we need to keep costs down for businesses, and secure the economic benefits of the transition to a low-carbon economy.
- Cultivating world-leading sectors we must build on our areas of competitive advantage, and help new sectors to flourish, in many cases challenging existing institutions and incumbents.
- 9. Driving growth across the whole country we will create a framework to build on the particular strengths of different places and address factors that hold places back whether it is investing in key infrastructure projects to encourage growth, increasing skill levels, or backing local innovation strengths.
- 10. Creating the right institutions to bring together sectors and places we will consider the best structures to support people, industries and places. In some places and sectors there may be missing institutions which we could create, or existing ones we could strengthen, be they local civic or educational institutions, trade associations or financial networks.

• Ipswich and Waveney Economic Areas Employment Land Needs Assessment (2016)

The Council, along with Ipswich Borough Council, have produced the Ipswich and Waveney Economic Areas Employment Land Needs Assessment (March 2016). The report assesses the entire District, including that part which is the Broads.

It provides an update to the economic needs evidence base for the respective local authority areas to 2031 by assessing economic development needs objectively in line with the National Planning Policy Framework (NPPF) and Planning Practice Guidance (PPG). The study considers future quantitative land and floorspace requirements alongside related qualitative factors for individual sectors and employment uses.

The evidence does not indicate the need for employment land in the Broads part of the district's to meet the overall employment land and jobs figures.

The Waveney Economic Area comprises the Waveney District administrative area, the most easterly District in Britain. Historically, Waveney's economy has been based on farming, printing, manufacturing, food processing and industries taking advantage of the coastal location, but in recent years has become increasingly recognised for its growing potential to support the offshore energy sector. Its close proximity to planned and operational wind farms has generated economic benefits for the District's key town of Lowestoft and this trend is expected to continue in future.

Great Yarmouth Borough Council Employment Land Update (2012)

The Borough Council have produced the Employment Land Update dated November 2012 . This study is a selective review of the Employment Land Study (Bone Wells, 2006) and the Lowestoft and Great Yarmouth Area Action Plans – Employment Land Evidence Base Report (DTZ, 2009). The report assesses the entire Borough, including that part which is the Broads.

Great Yarmouth is dominated by two major industries; the energy industry and tourism. The port is also a major economic driver.

Of note, the study identifies employment land in the area Borough and recommends some areas to become employment land; some of these sites are located near to the Broads (go to maps after page 36 at https://www.great-yarmouth.gov.uk/CHttpHandler.ashx?id=1246&p=0). The evidence does not indicate the need for employment land in the Broads part of the Borough to meet the overall employment land and jobs figures.

North Norfolk District Council Business Growth and Investment Opportunities Study (2015)

This Business Growth and Investment Opportunities Study has been prepared for NNDC by the BE Group to assess the local business dynamics and provide recommendations as to encouraging further business investment in North Norfolk. The study forms part of the evidence base for the development of policies in the evolution of the Local Plan and to identify means of attracting inward investment.

The North Norfolk community is characterised by an ageing population, low (but positive) population growth, low unemployment and a moderately skilled workforce. The economy is centred on retailing, tourism, manufacturing and services such as health. The largest employment nodes are Fakenham and North Walsham.

None of the development options considered in the report seem to be in the Broads.

• The Making of an Industrial Strategy – Localis 2017

Localis are an independent, cross-party, leading not-for-profit think tank that was established in 2001. The work promotes neo-localist ideas through research, events and commentary, covering a range of local and national domestic policy issues. This particular piece of research relates to the economy of the country.

The stifled and the stuck. Our research also identifies two sets of places which require special intervention in the industrial strategy. Firstly, the places that are growing quickly but whose growth is restricted by their boundaries are the stifled. Our research suggests these are the places that are successfully reorienting their economies based on demographic and economic trends. They are fast growing, with associated growing pains, but are often stymied by their administrative boundaries. They need the power to grow. Secondly, the places that are still dealing with the fallout of the industrial trauma of the 1980s are the stuck. Our research suggests these are the thirty most structurally challenged local economies in England, which perform poorly on multiple indicators, both long term demographic trends and more immediate short term economic performance. They are penumbra economies that have not recovered from the 1980s. They have weak labour markets and much of the growth experienced in the past

few decades has been in poorly-paid and insecure sectors such as retail. Many have attracted a great deal of investment from central government and the European Union, but structural issues persist. Local council's political make-up is often multi-party coalitions or, at the other end of the scale, 'one party states'. Greater top-down intervention is required, focused on building local capacity in leadership and skills.

Great Yarmouth, South Norfolk and North Norfolk are in the top 30 structurally weakest economies in England and classed as Stuck. Norwich is classed as stifled.

• Salhouse Neighbourhood Plan (2017)

The Salhouse Neighbourhood Plan provides a vision for the future of the Parish of Salhouse from 2016 to 2026. Fundamentally, the Plan also provides a number of policies that future development must take into account which will help to ensure that the vision is achieved.

The Salhouse Neighbourhood Plan provides policies that complement existing local, national and strategic planning policy. The policies in this Plan are intended to provide additional detail and subtlety that reflect the special characteristics of the village that cannot reasonably be addressed by higher level policies.

OE1: Development, Natural Heritage and Countryside OE2: Enhancement of our Natural Heritage and Countryside OE3: Protecting Our Dark Night Skies OE4: Managing Land Use Change OE5: Promoting Improved Connectedness in the Parish OE6: Promoting a Safer Village EMP1: Existing facilities EMP2: New facilities H1: New Housing Development H2: Housing Mix H3: Provision of Sheltered Housing within the village

• <u>Accommodation for older people – current supply, current need and future need (2017)</u> This report uses statistical analysis to produce accommodation needs for older people in Norfolk to 2036. The report is intended to be read in association with the Strategic Housing Market Assessments (SHMAs). The year 2036 was chosen because it is the basis of the Central Norfolk SHMA, which covers six administrative areas: Breckland, Broadland, North Norfolk, Norwich, South Norfolk and The Broads Authority. Great Yarmouth and King's Lynn & West Norfolk have separate SHMAs. There are no specific figures for the Broads Authority Executive Area.

<u>Recreation Impacts Study - Visitor Surveys at European Protected Sites (Footprint Ecology - 2016)</u>

This report provides a comprehensive analysis of current and projected visitor patterns to European protected sites across Norfolk. Visitor surveys were undertaken across Norfolk. The report is novel in that it combines data from multiple local authorities to predict changes in recreation use as a result of new housing planned across Norfolk. It also provides recommendations for mitigation and monitoring.

The work was commissioned by Norfolk County Council/the Norfolk Biodiversity Partnership (NBP) on behalf of all local planning authorities across Norfolk. The surveyed locations covered a range of European Protected sites, locations that are afforded strict protection within the planning system due to their importance for nature conservation. All the locations are also sites with public access and a potential risk whereby increased recreation levels could be damaging.

The work was carried out during 2015 and 2016 at 35 agreed sites. Analysis also drew on other data, for example planned residential growth (as allocated in current plans), provided by districts. The locations encompassed estuary, coast, heathland, wetland, and grassland and woodland habitats. We grouped the points into seven broad geographic areas: the Brecks, the Broads, The East Coast, the North Coast, Roydon and Dersingham, the Valley Fens and the Wash. Surveys at each point involved 16 hours of survey work split evenly between weekdays and weekends and spread across daylight hours. As such fieldwork was standardised and broadly comparable.

Surveys took place at different times of year at different locations, with the timing targeted to coincide with times when wildlife interest (e.g. designated features of European Protected sites) was present and access was likely to be high. Fieldwork involved counts of people and interviews with a random sample of visitors.

Through analysis of visitor surveys it provides a strategic overview to aid the understanding of the relationship between population growth (including new housing growth and tourist growth) and the potential for impacts on internationally designated wildlife sites throughout Norfolk. The Study provides updated evidence to inform the preparation of Local Plans.

It is principally concerned with:

- establishing the number and behaviour of visitors at the designated sites;
- predicting increases in access by Norfolk residents;
- drawing analysis around routes on sites, and distance travelled and frequency of use.

All of which will help to make the links between new housing development and recreation use and provide evidence to inform Local Plan preparation including the development of appropriate monitoring and mitigation measures for these designated sites.

1. Relating to housing change, links to allocated new housing, these include:

- A predicted 14% increase in access by Norfolk residents to the sites surveyed (in the absence of any mitigation), as a result of new housing during the current plan period.
- The individual areas the predicted increase will be:
 - around 30% in the Brecks,.
 - 14% for the Broads;
 - 11% for the East Coast;
 - 9% for North Norfolk;
 - 15% for Roydon & Dersingham;
 - 28% for the Valley Fens and
 - 6% for the Wash

(note these figures relate to the surveyed access points only and to visits by Norfolk residents).

• For parts of the North Coast, the Broads, and parts of the East Coast, the links between an increase in local housing and recreation impacts are less clear as these sites attract a high number of visitors coming from a wide geographical area, both inside and outside Norfolk. There are therefore likely to be pressures from overall population growth both from within the county and further afield.

2. Relating to the visitor survey results, these include:

- Over half (52%) of interviewees were visiting from home and resident within Norfolk. Some 16% of interviewees had travelled from home on a short visit/day trip and lived outside Norfolk.
- In total 6,096 groups were estimated to be entering or leaving sites across all survey points. These groups consisted of 13,842 adults, 2,616 minors and 3,466 dogs.
- Dog walking (41%) and walking (26%) were the most popular activities overall, but with big variations depending on the sites. Within individual areas this first and second ranking of dog walking and walking was consistent for the East Coast, Roydon & Dersingham, the Valley Fens, the Wash and the North Coast. Within the Valley Fens and Norfolk Coast dog walkers and walkers accounted for three quarters of interviewees.
- Two thirds (66%) of interviewees were on a short trip from home and around a third (32%) of interviewees were on holiday. Holiday-makers accounted for nearly half of all visitors interviewed at the North Coast and Broads.
- Some of the sites have high proportions of daily visitors and high average travel instances. This suggests that some of the sites with a strong draw over long distances still have daily visitors.
- Holiday-makers were typically staying in self-catering accommodation (31%) or campsite/caravan sites (29%). In the Broads over half (59%) of the holiday makers interviewed were staying on a boat.
- The most commonly reported duration on site was 1 to 2 hours (31%), closely followed by between 30 and 60 minutes (27%). Key differences were the large proportion of interviewees visiting for more than 4 hours in the Broads (29% of interviewees) and conversely at Roydon, the large proportion visiting for less than 30 minutes (36%).

- Across all interviewees (including holiday makers), 31% of those interviewed were visiting the site for the first time. For those interviewees travelling from home on a short visit/day trip, over a quarter (27%) indicated they visited the site at least daily, reflecting high frequencies of use by local residents.
- Over three quarters (77%) of all interviewees had arrived at the interview location by car. Most of the remaining interviewees (18%) had arrived on foot.
- 'Close to home' was one of the main reasons people gave for choosing the site where interviewed that day. Scenery was particularly important for those visiting the North Coast.
- Just over a third (36%) of interviewees were aware of a designation/environmental protection that applied to the site they were visiting.
- A total of 1,314 routes were mapped from the interviews, showing where people had walked during their visit. Median route length across all sites and all activities was 3.18km. Across all sites the typical (median) dog walk was 2.93km. Walkers covered a median distance of 3.7km while activities such as boating (median 7.64km) covered longer distances.
- In the Norfolk coast 4.91km was the average route length. Hotspots for walking routes in Norfolk Coast are Brancaster, Holkham and Wells.
- Across Norfolk the average route length fell to 3.18km.
- The three main reasons for visiting the sites in North Coast are; scenery 21.8%, close to home 18.3% and other 13.7% (long distance walking, seal and wildlife watching)

• Greater Norwich SFRA, JBA (2017)

The key objectives of the 2017 Strategic Flood Risk Assessment are:

- To provide up to date information and guidance on flood risk for Greater Norwich taking into account the latest flood risk information and the current state of national planning policy;
- To determine the variations in risk from all sources of flooding in Greater Norwich, taking into account climate change;
- To identify the requirements for site-specific flood risk assessments;
- To consider opportunities to reduce flood risk to existing communities and developments;
- To enable the local authorities in the Greater Norwich to apply the Sequential Test;
- To aid authorities in identifying when the Exception Test is required and when a more detailed Level 2 SFRA will be required, when determining strategic site allocations; and,
- To inform the Sustainability Appraisal of the authorities' Local Plans, so that flood risk is taken into account when considering strategic site allocations.

This report fulfils Level One SFRA requirement. To meet the objectives, the following outputs have been prepared:

- Assessment of all potential sources of flooding;
- Assessment of the potential impact of climate change on flood risk
- Mapping of all potential sources of flooding including climate change;
- Mapping of location and extent of functional floodplain;
- Mapping of "dry islands";
- Assessment of standard of protection provided by existing flood risk management infrastructure;
- Mapping of areas covered by Environment Agency Flood Warnings;
- Review opportunities to reduce flood risk to existing communities and development;
- Guidance for developers including requirements for site-specific flood risk assessments and general advice on the requirements and issues associated with Sustainable Urban Drainage Systems (SuDS); and,
- Recommendations of the criteria that should be used to assess future development proposals and the development of a Sequential Test and sequential approach to flood risk.

Many maps accompany the report which show the different flood risks around Greater Norwich.

• Ipswich and Waveney Housing Market Areas Strategic Housing Market Assessment Part 1, Peter Brett Associates, May 2017

Ipswich Borough Council (IBC), Babergh District Council (BDC), Mid Suffolk District Council (MSDC), Suffolk Coastal District Council (SCDC) and Waveney District Council (WDC) jointly commissioned Peter Brett Associates (PBA) to undertake this study in September 2016.

The brief set out the following objectives and outputs:
To test and confirm the housing market geography;
To produce conclusions on objectively assessed housing need.

The data shows that, in isolation, Waveney could form a reasonable HMA. The addition of Great Yarmouth may result in greater containment, which could be considered a statistically more robust HMA. But the downside to this alternative HMA is that it would include the distinctive Waveney towns, such as Beccles, Bungay and Southwold, in an HMA with Great Yarmouth - a town with which they are poorly related in statistical and contextual terms.

13.18 The table below sets out the summary assessment for Waveney in terms of the demographic starting point, market signals uplift and future jobs uplift. The last two columns of the table show the OAN. The total for 2014-36 is in the penultimate column and the annual average in the final column.

Table 13.1 Summary assessment for the WHMA

| | Dwellings per annum | Total dwellings | Market signals uplift (%) | Market signal uplift (dwellings) | Future jobs uplift (dwellings) | OAN (dwellings) | OAN (dpa) |
|---------|---------------------------|--------------------|------------------------------------|---|--------------------------------------|--------------------|--------------|
| Waveney | 374 | 8,223 | - | - | - | 8,223 | 374 |

Relationship with the Broads Authority

Because part of the Broads Authority overlaps into Waveney, Waveney's OAN necessarily includes an element of need which could be met within the Broads. We are aware that the Central Norfolk SHMA identifies an OAN, disaggregated into the various local authorities which the Broads covers, for the Broads Authority.

We do not revisit that work or review the method used to derive the figures as part of this study but can confirm that the Waveney OAN set out above is inclusive of needs in the Waveney part of the Broads Authority.

• UK plan for tackling roadside nitrogen dioxide concentrations. Detailed plan. July 2017. DEFRA and DfT.

This document is the UK air quality plan for bringing nitrogen dioxide (NO2) air pollution within statutory limits in the shortest possible time. It is accompanied by a Technical Report.

The most immediate air quality challenge is tackling the problem of NO2 concentrations around roads - the only statutory air quality limit that the UK is currently failing to meet. The issue is particularly experienced in towns and cities which should be healthy places. The UK government is committed to taking action against poor air quality in urban areas. Combined with the wider actions to reduce other harmful air pollution emissions, this plan will help our towns and cities to become cleaner and help to grow the economy.

Numerous actions identified, some of which relate to further Bills or guidance.

Appendix C: Comments received on the Interim Sustainability Appraisal

Natural England

Broads Authority Officer Summary of Representation: General support to the methodology and baseline of the SA. **Broads Authority comment:** Support noted.

Historic England

Broads Authority Officer Summary of Representation:

1: We now note that PPS5 Practice Guide has been superseded by National Planning Policy Guidance, Good Practice Guidance Notes (as produced by Historic England on behalf of the sector) and Advice Notes (as produced by Historic England).

2: We now note SA objective ENV4 and ENV9. These are in response to our previous comments at scoping stage. Historic England welcomes this additional detail.

3: As the document is taken forward we would welcome additional commentary in explanatory script at the bottom of each option.

4: Where a question mark is denoted (unknown impact on SA objective), additional commentary in explanation of this uncertain outcome would be welcomed as the evaluation of options progresses.

Broads Authority comment:

1: Noted.

2: Support noted

3: This will of course be done as there will be policy wording to assess.

4: We do this in the interim SA under each table if required.

Appendix D: Comments received on the Preferred Options Sustainability Appraisal

Natural England

Natural England welcomes the Sustainability Appraisal (SA) Report for the Local Plan.

A number of Local Plan objectives have been scored as having uncertain effects as listed in the table (p14) and as described in the text (p15) under 6. Compatibility of the SA Objectives and Local Plan Objectives. We recognise that the Local Plan is a high level spatial document and there are degrees of uncertainty as quantifiable details on the location, scale, extent or type of future proposals are not available at this time. Consideration should be given as to whether the right appraisal questions are being asked, if it is not possible to provide definite (negative, neutral or positive) answers, and we suggest that these questions are re-visited. Could the uncertainty in scoring be satisfactorily resolved by amending the wording of the relevant policies to ensure that any identified impacts can be avoided and/or mitigated for? It may also be worth revisiting the evidence base for the SA, in order that greater clarity can be brought to the appraisal process.

BA summary: Consideration should be given as to whether the right appraisal questions are being asked, if it is not possible to provide definite (negative, neutral or positive) answers, and we suggest that these questions are revisited.

BA comment: It is not unusual for SA assessments to have a ?as no specific recommendations have been suggested, no change.

RSPB

The text regarding the Habitats Regulations process is incorrect. The inaccuracies relate to:

- The Habitats Regulations transpose both the European Commission Birds Directive and Habitats Directive into UK law under the Conservation of Habitats and Species Regulations 2010.

- Appropriate Assessment is a stage within the Habitats Regulations Assessment.

- The process requires screening for Likely Significant Effects (LSE) from plans and projects on Natura 2000 sites and Ramsar sites.

- Where the potential for LSE to occur is identified then an Appropriate Assessment is undertaken to demonstrate that there will be no adverse effects on integrity (AEOI) of Natura 2000 sites and Ramsar sites from plans or projects. It is at this stage that mitigation measures will be considered to demonstrate that impacts will be effectively managed such that adverse effects are avoided in the first instance, or minimised to such a point that AEOI can be ruled out.

- Alternative options will be considered where mitigation measures are considered insufficient to minimise impacts such that a conclusion of no AEOI can be reached.

- The current wording of "significant adverse effect" is not consistent with the Habitats Regulations, as it indicates that some level of adverse effect would be acceptable.

A revised section based on Section 1.3 (p.4) of the draft Local Plan or the process set out in more detail in paragraphs 1.6-1.12 (p.7) of the Habitats Regulations Assessment of the draft Local Plan would be appropriate.

BA summary: The text regarding the Habitats Regulations process is incorrect. A revised section based on Section 1.3 (p.4) of the draft Local Plan or the process set out in more detail in paragraphs 1.6-1.12 (p.7) of the Habitats Regulations Assessment of the draft Local Plan would be appropriate.

BA comment: Noted and will improve the text.

Suffolk Wildlife Trust

We note that the text relating to Habitats Regulations on page 6 of the Sustainability Appraisal document appears to incorrectly set out the process. We recommend that this revised to correctly set out the required HRA process, in accordance with paragraphs 1.6 to 1.12 of the HRA Report.

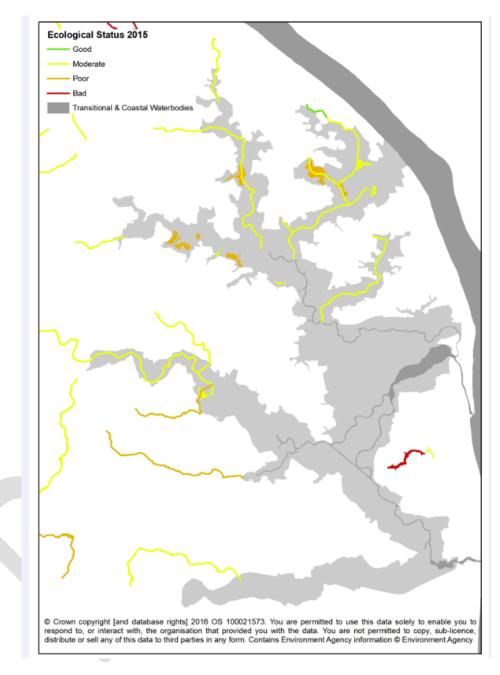

BA summary: Recommend SA revised to correctly set out the required HRA process, in accordance with paragraphs 1.6 to 1.12 of the HRA Report.

BA comment: Noted, will reflect the HRA wording.

Appendix E: The Broads - baseline

In addition to the baseline data included in the SA Scoping Report¹¹, the following have been updated to reflect 2017 data where available.

a. <u>Water Quality – Ecological Status</u>

• PSA: The Government's Public Service Agreement (PSA) target to have 95% of the SSSI area in favourable or recovering condition by 2010.

- Favourable condition: means that the SSSI land is being adequately conserved and is meeting its 'conservation objectives', however, there is scope for the enhancement of these sites.
- Unfavourable Declining: This means that the special interest of the SSSI unit is not being conserved and will not reach favourable condition unless there are changes to site management or external pressures. The site condition is becoming progressively worse.
- Unfavourable no change: This means the special interest of the SSSI unit is not being conserved and will not reach favourable condition unless there are changes to the site management or external pressures. The longer the SSSI unit remains in this poor condition, the more difficult it will be, in general, to achieve recovery.
- Unfavourable Recovering: Unfavourable recovering condition is often known simply as 'recovering'. SSSI units are not yet fully conserved but all the necessary management measures are in place. Provided that the recovery work is sustained, the SSSI will reach favourable condition in time. In many cases, restoration takes time. Woodland that has

been neglected for 50 years will take several years to bring back into a working coppice cycle. A drained peat bog might need 15-20 years to restore a reasonable coverage of sphagnum.

c. <u>Boat Usage</u>

Source: Broads Authority Tolls Team.

| Annual Boat Numbers as at 1st N | lovember | | | | | | | | | |

d. Job Seekers Allowance (Parishes) (Source: http://www.nomisweb.co.uk)

The Parishes that are in the Broads Executive Area are in the following Wards. The percentage figures show the number of JSA claimants as a proportion of resident population aged 16-64. The average for Great Britain is 1.8% Red highlights the highest level and green highlights the lowers level. Please note that in most cases only part of the Parish is in the Broads Executive Area: this is the best data available for monitoring unemployment levels in the Broads.

| e. | Visitor | statistics | 2015 |
|----|---------|------------|------|
| | | | |

| 7.4 Million |
|--------------|
| £431 Million |
| £584 Million |
| 7,245 |
| |

These figures show a small decrease on 2014

Visitor numbers are down 4%, but 2014 was 3% up on the previous year and a drop of just 1% over two years is statistically insignificant.
