

Broads Local Plan 2036 NPPF Paragraph 161 Deprivation Topic Paper January 2016

1. Introduction

The NPPF at Paragraph 161 requires a Local Plan to consider deprivation:

161. Local planning authorities should use this evidence base to assess:

locations of deprivation which may benefit from planned remedial action

This Topic Paper discusses the issue of Deprivation as it relates to the Broads Authority Executive Area.

2. The Broads and Lower Layer Super Output Areas (LSOAs)

LSOAs (Lower-layer Super Output Areas) are small areas designed to be of a similar population size, with an average of approximately 1,500 residents or 650 households. There are 32,844 Lower-layer Super Output Areas (LSOAs) in England. They were produced by the Office for National Statistics for the reporting of small area statistics.

For each measure, the LSOA with a **rank** of 1 is the most deprived and the LSOA with a rank of 32,844 is the least deprived. The following map and tables (Figure 1) shows the LSOAs that are part or all within the Broads Authority Executive area.

3. <u>Indices of Multiple Deprivation - Maps</u>

Maps later in the document show the parts of the LSOAs in the Broads and uses a traffic light system showing the least deprived as green (the highest ranking) and most deprived as red (lowest ranking).

It is important to note that whilst looking at the maps, not all of the population of the LSOA are entirely within the Broads. Because LSOAs span the boundary of the Broads Authority Executive Area, an assessment was made to ascertain the likely proportion of population of a particular LSOA in the Broads. This is at Appendix A. The maps later in the document only show LSOAS which are likely to have a population in the Broads part of the LSOA. Those assessed as having 0% population in the Broads are white (and so too is Breydon Water). The following tables summarises the data in Appendix A and shows the percentage of the population of a LSOA within the Broads.

Figure 1: LSOAs which are all or part in the Broads Authority Executive Area.

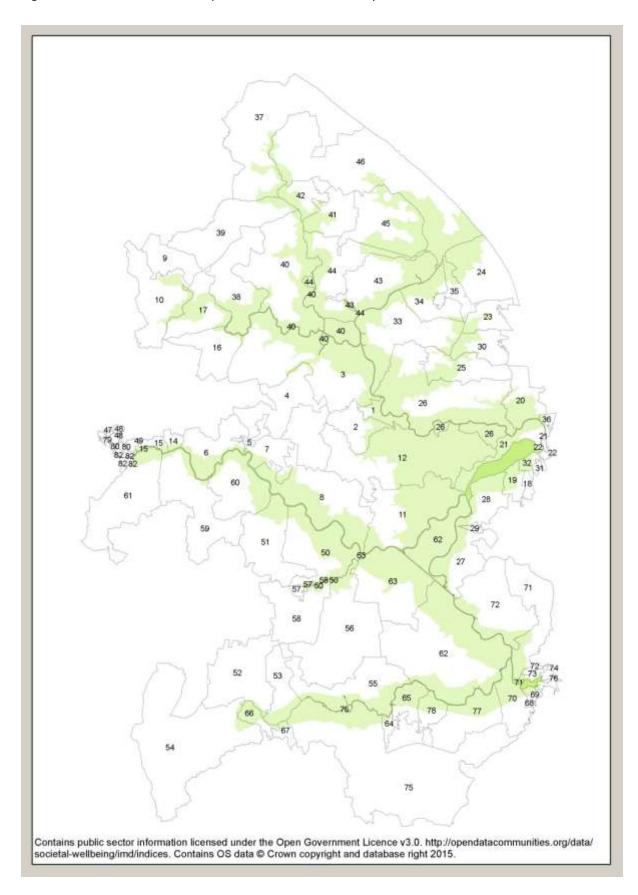

Table 1: This table gives the LSOA reference number for each map reference as well as the estimated percentage of the population of each LSOA within the Broads.

1. Index of Multiple Deprivation

The **Index of Multiple Deprivation** (IMD) is an overall relative measure of deprivation constructed by combining seven domains of deprivation according to their respective weights, as described below.

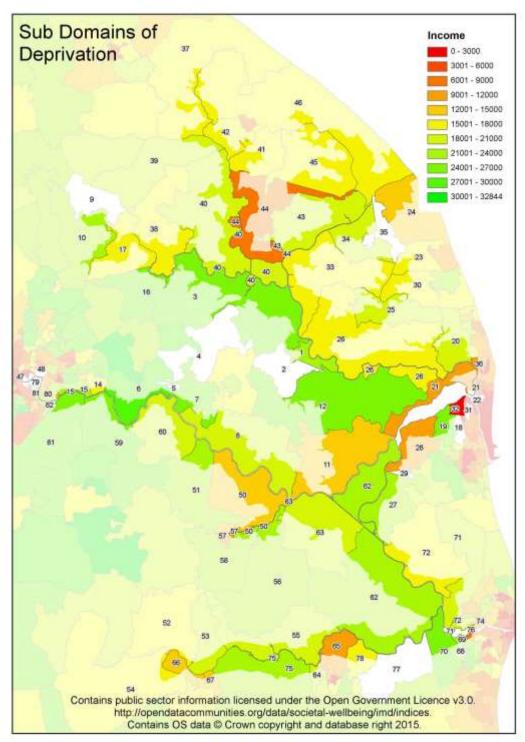

- Income Deprivation (22.5%)
- Employment Deprivation (22.5%)
- Education, Skills and Training Deprivation (13.5%)
- Health Deprivation and Disability (13.5%)
- Crime (9.3%)
- Barriers to Housing and Services (9.3%)
- Living Environment Deprivation (9.3%)

These Domains are also discussed in this document separately.

2. The Income Deprivation Domain

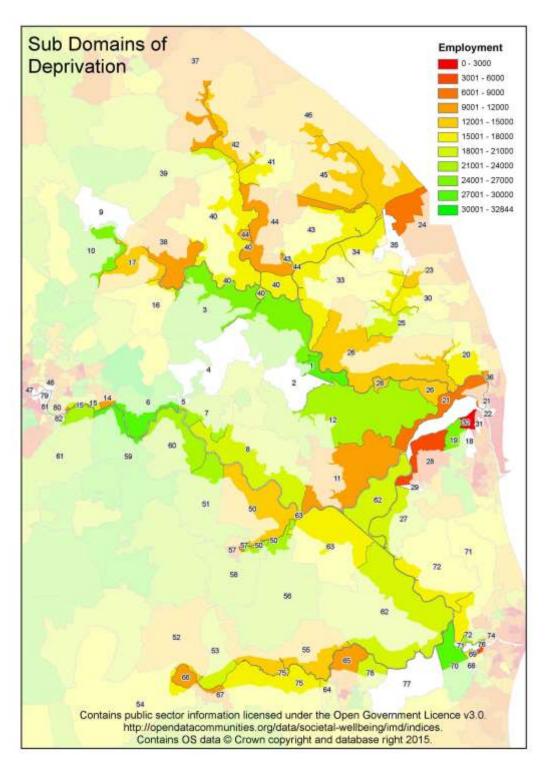

The **Income Deprivation** Domain measures the proportion of the population experiencing deprivation relating to low income. The definition of low income used includes both those people that are out-of-work, and those that are in work but who have low earnings (and who satisfy the respective means tests).

As a whole, income deprivation is generally low. There are some pockets where the deprivation levels are high with the highest area of deprivation (so the red colour and lowest ranking) being near Great Yarmouth.

3. The Employment Deprivation Domain

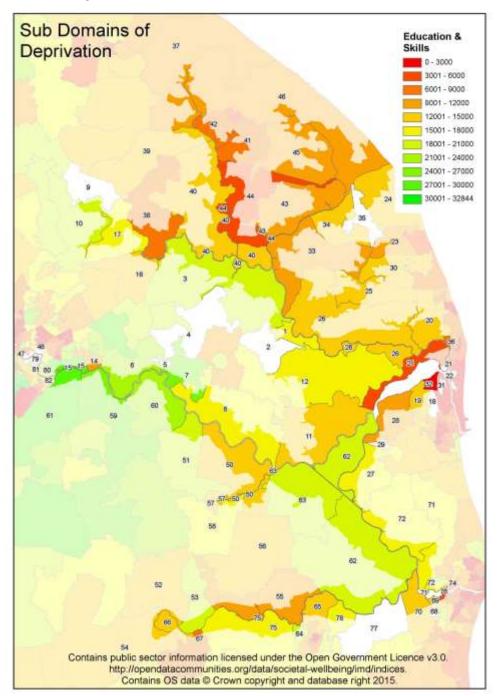

The **Employment Deprivation** Domain measures the proportion of the working-age population in an area involuntarily excluded from the labour market. This includes people who would like to work but are unable to do so due to unemployment, sickness or disability, or caring responsibilities.

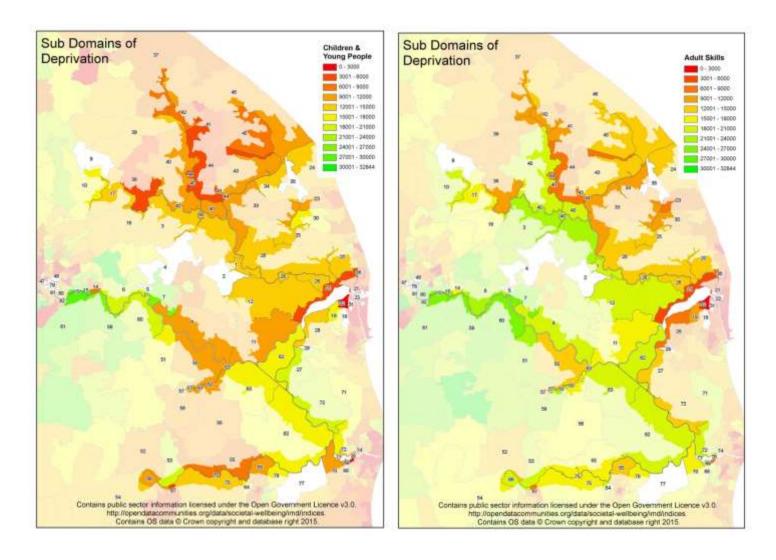

Employment deprivation sees red areas around Great Yarmouth and Burgh Castle as well as a small pocket of red in Oulton Broad.

4. The Education, Skills and Training Deprivation Domain

The **Education, Skills and Training Deprivation** Domain measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains: one relating to children and young people and one relating to adult skills.

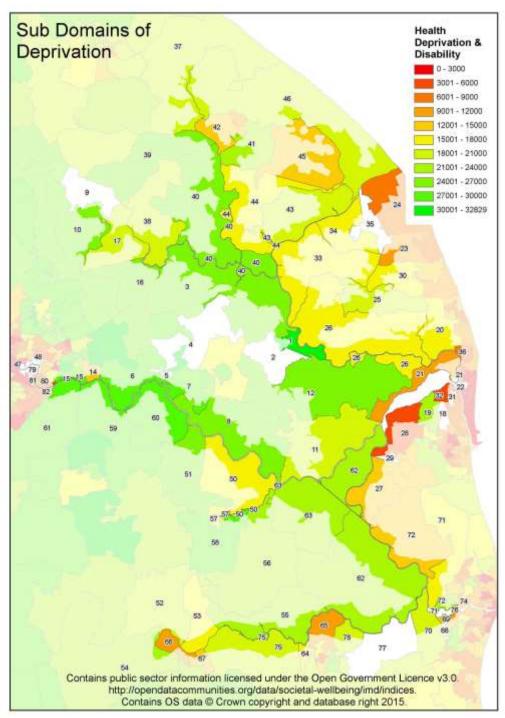

The **Education, Skills and Training Deprivation Domain** measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains: one relating to children and young people and one relating to adult skills. These two sub-domains are designed to reflect the 'flow' and 'stock' of educational disadvantage within an area respectively. That is, the **Children and Young People Sub-domain** measures the attainment of qualifications and associated measures ('flow'), while the **Adult Skills Sub-domain** measures the lack of qualifications in the resident working-age adult population ('stock').

The map on the left shows the children and young people sub-domain. The map is generally orange suggesting the area is towards the more deprived in relation to qualifications attainment of children. Whereas for adults, the map is greener in general so towards the least deprived. Two red pockets are shown on both maps around the Great Yarmouth and north of Breydon Water area.

5. The Health Deprivation and Disability Domain

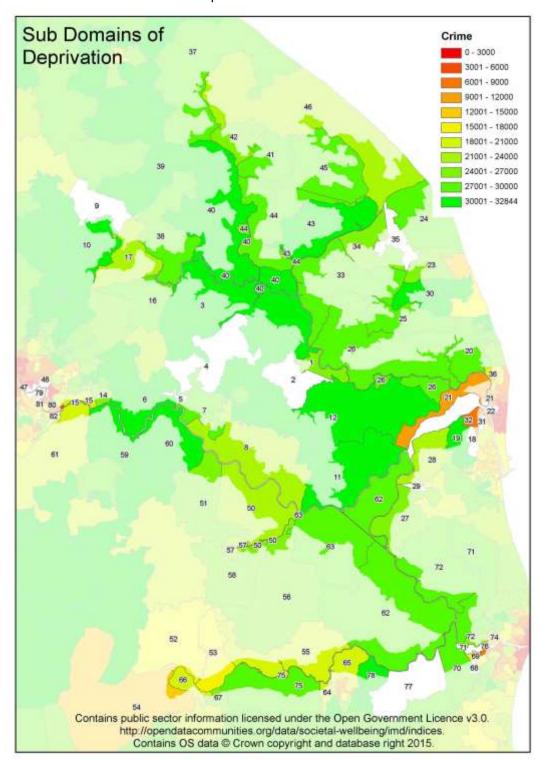

The **Health Deprivation and Disability** Domain measures the risk of premature death and the impairment of quality of life through poor physical or mental health. The domain measures morbidity, disability and premature mortality but not aspects of behaviour or environment that may be predictive of future health deprivation.

The maps shows that health deprivation is generally towards the least deprived, although there are some darker colours showing more deprivation in some isolated pockets.

6. The Crime Domain

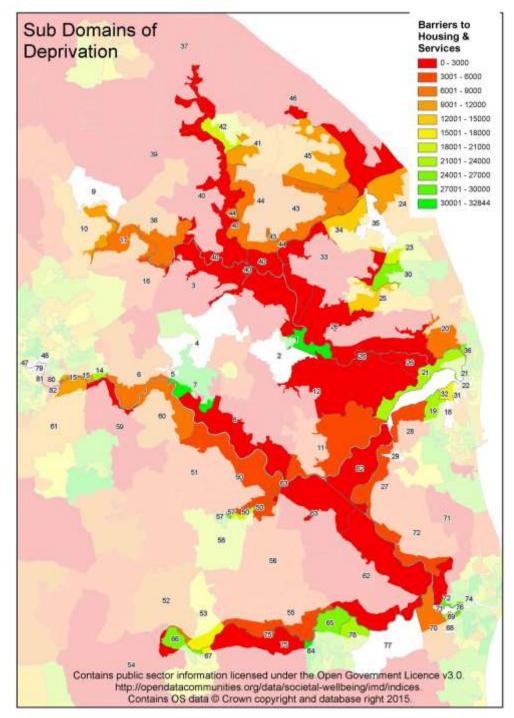

The **Crime** Domain measures the risk of personal and material victimisation at local level.

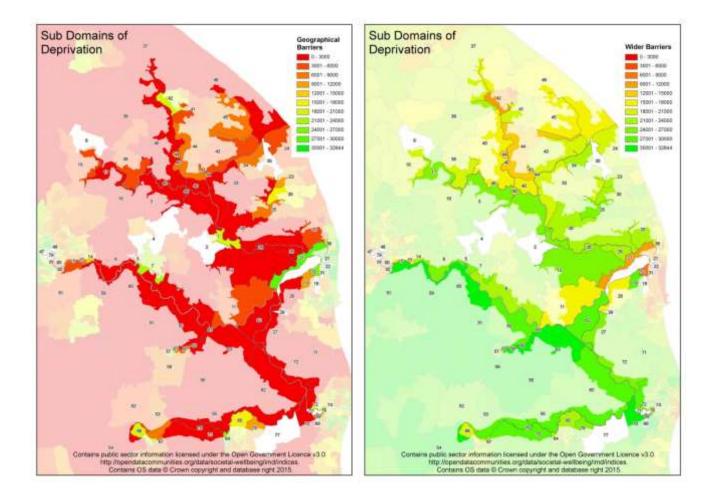

Generally in terms of crime deprivation, the Broads Authority Executive Area is least deprived, shown by the green on the map. There are some areas around Great Yarmouth and Breydon Water which are darker in colour.

7. The Barriers to Housing and Services Domain

The **Barriers to Housing and Services** Domain measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability.

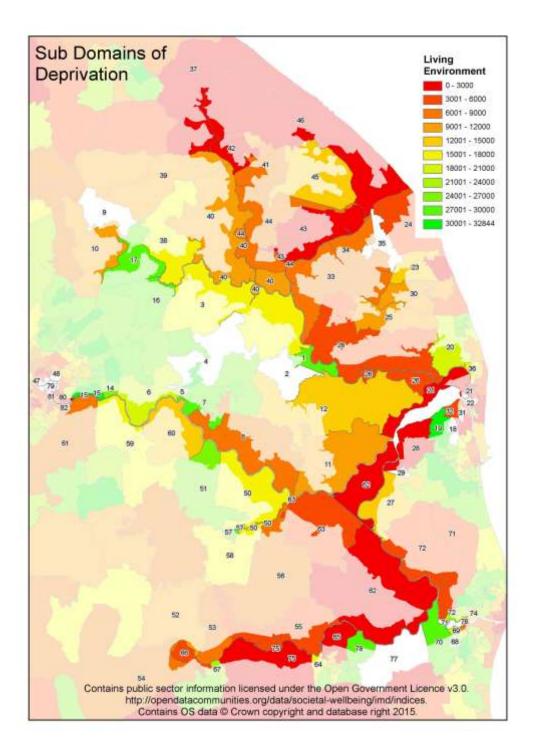

The Barriers to Housing and Services Domain measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: the Geographical Barriers Sub-domain, which relates to the physical proximity of local services and the Wider Barriers Sub-domain which includes issues relating to access to housing such as affordability.

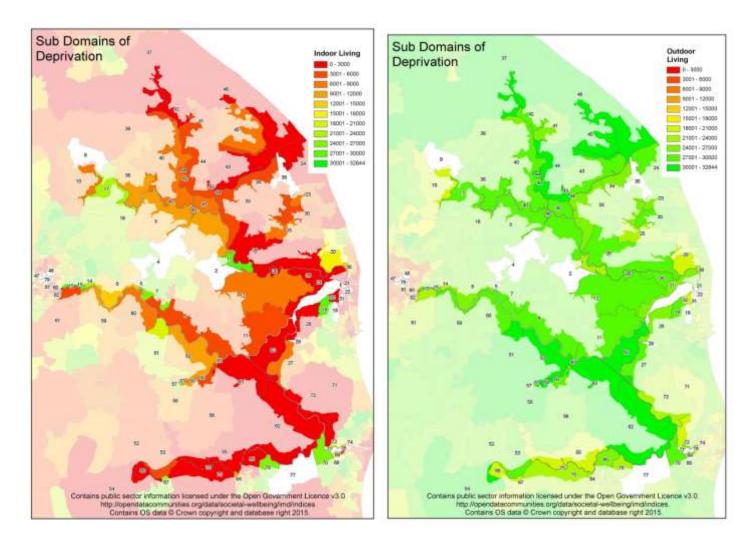

The map on the left shows Geographical Barriers to local services. This shows that the Broads is quite deprived. This could reflect the rural nature of the area with urban areas being lighter in colour. The map on the right show wider barriers such as access to housing and affordability. The Broads is towards the green end of the spectrum showing that in general it is least deprived.

8. The Living Environment Deprivation Domain

The **Living Environment Deprivation** Domain measures the quality of the local environment. The indicators fall into two sub-domains. The 'indoors' living environment measures the quality of housing; while the 'outdoors' living environment contains measures of air quality and road traffic accidents.

The **Living Environment Deprivation Domain** measures the quality of the local environment. The indicators fall into two sub-domains. The **Indoors Sub-domain** measures the quality of housing; while the **Outdoors Sub-domain** contains measures of air quality and road traffic accidents.

The map on the left shows indoors subdomain. This seems to paint a picture that housing quality in the Broads overall is quite poor (notwithstanding pockets of green). Whereas the map on the right, which shows outdoors subdomain, shows the entire area of the Broads as being amongst the least deprived in the country.

Conclusion

The Government requires deprivation to be considered as Local Plans are produced. This report shows the 2015 deprivation domain and sub-domains using a traffic lights system on maps. The results are mixed with the Broads Authority Executive Area being least deprived in relation to crime and health but is more deprived in relation to indoor living and geographical barriers domains.

The following table discusses the findings and indicates how the Local Plan can seek to address the domains.

Domain or Sub-domain	Action in the Local Plan			
Income Deprivation Domain	The Local Plan will have an Economy section as well as a			
Employment Deprivation Domain	section on Tourism which relate to employment and could			
Employment Deprivation Domain	positively affect this domain.			
Children and Young People Sub-domain	The education authorities do not require the Local Plan to			
Cilidren and roung reopie 3ub-domain	enable schools or school extensions.			
	The economy and employment sections of the Local Plan			
Adult Skills Sub-domain	could be of relevance, but no specific actions relating to			
	adult skills are proposed within the Local Plan.			
	No specific health requirements are set on the Local Plan.			
Health Domain	The Local Plan will have a section on health and planning			
	with the aim of enabling healthy lifestyles.			
Crime Domain	As the area is least deprived on this topic, other than			
Crime Domain	general design policies, no specific action is required.			
	The Local Plan will have a policy on pubs. There is no			
Geographical Barriers Sub-domain	education or health requirement set on the Local Plan.			
Geographical Barriers Sub-domain	The Local Plan will seek to protect the retail areas within			
	the Broads.			
Wider Barriers Sub-domain	The Local Plan will address housing need and have a policy			
Wider Barriers 3db-domain	on affordable housing.			
	The Local Plan will have policies that enable			
Indoors Sub-domain	improvements or changes to dwellings which could			
	positively affect this domain.			
Outdoors Sub-domain	No specific action required.			

In most cases LSOAs are part in the Broads and part outside of the Broads, so in planning terms, it will be for other Local Planning Authorities to consider actions to benefit the communities in the LSOAs as well as the Broads Authority through the actions stated in the table above.

It is also important to note that the Broads Authority does not exercise functions which Councils do, such as community, education and housing functions. So there is a role for the District and County Councils in addressing deprivation. Furthermore, other partners have a responsibility for and expertise in addressing other domains such as CCGs and NHS England in relation to health or the Local Enterprise Partnership in relation to employment. Addressing deprivation needs a collaborative approach.

^{*}Note that the original calculation results in 139% of the population of an OA is in the Broads. This is a reflection that we are applying the average household density across the Broads to each number of dwellings in the BA part of an OA. On this occasion, all dwellings in this OA are in the Broads. As such, we have taken the population to be that as per the Census. This has resulted in the total population in this table being different to that of the 2011 Census (6,271). However, the table gives an indication of where the population of the Broads lives, which is the purpose of the exercise.
