

Appendix E: Survey Monkey responses to Preferred Options consultation

Residential moorings	As above, there is a large calling for regulated residential moorings on the broads.
Development Boundaries	Welcomed, if not class enforced.
Gypsy and travellers	Recent law changes mean a reduction in support to Romany who cannot move along every six months; sites and moorings are minimal with large waiting lists so we can't actually move along either without breaking the law and angering communities. What should we do? Improve community development initiatives with Gypsy & Travellers, establish recognised residential sites within access of medical resources, and only accessible upon application, keep new age heroin users out! We don't want them either!
