1 Introduction

1.1 About this assessment

The purpose of this assessment is to provide information on the range and extent of land which could be considered for development to meet the objectively assessed needs identified for housing and economic development in the Broads across the period 2016-2036. The Housing and Economic Land Availability Assessment (HELAA) is a key evidence document which supports the preparation of Local Plans. Its purpose is to test whether there is sufficient land to meet objectively assessed need (OAN) and identifies where this land may be located. The HELAA represents just one part of wider evidence and should not be considered in isolation of other evidence.

The HELAA for the Broads Authority assesses sites which will be rolled forward to the Local Plan from the Sites Specifics Local Plan 2014 as well as new regeneration sites and other sites put forward by landowners through the various Local Plan consultation stages and pre-application enquiries with Development Management Officers. A call for sites has not been completed as the rolled forward sites, permissions and completions since 2015 all meet (and indeed exceed) the Objectively Assessed Housing Need for the Broads¹.

1.2 <u>The HELAA Methodology²</u>

This HELAA methodology has been agreed by each of the commissioning Local Planning Authorities (LPAs)³ in line with the Duty to Cooperate and in recognition of the functional housing market and economic market areas and the cross-boundary movement in the markets. **A consistent methodology** across the Norfolk area is considered beneficial and will ensure each LPA prepares its HELAA in a consistent way. This will ensure that each of the individual LPAs understand the level of growth that can be planned for and the areas of each District where the growth could be accommodated. At a more detailed level it will also help the LPAs choose the best individual sites to allocate in Local Plans to meet the growth planned.

The HELAA methodology will apply to the local planning authority areas of:

- Breckland Council;
- Broadland District Council;
- Broads Authority⁴;
- Great Yarmouth Borough Council;
- Borough Council of King's Lynn and West Norfolk;
- North Norfolk District Council;
- Norwich City Council; and,
- South Norfolk Council.

¹ See the Housing Topic Paper for more information: <u>http://www.broads-authority.gov.uk/planning/planning-plance-base2</u>

² HELAA methodology <u>http://www.broads-authority.gov.uk/planning/planning-policies/development/future-local-plan/evidence-base2</u>

³ Commissioning Local Planning Authorities (LPAs) are: Breckland District Council, Broadland District Council, Broads Authority, Great Yarmouth Borough Council, Borough Council of King's Lynn and West Norfolk, North Norfolk District Council, Norwich City Council, and South Norfolk District Council.

⁴ The Broads Authority area includes a small part of Suffolk and this methodology is consistent with that used by Waveney District Council.

The Consultation for the HELAA methodology was undertaken across the seven districts and the Broads Authority between 21 March and 3rd May 2016. In total 25 responses were made with approximately 110 individual comments from developers, landowners and landowners' agents, specific consultees such as Norfolk County Council & Anglian Water and members of the public. The methodology was broadly supported with most comments seeking greater clarity and context.

Please note that the HELAA methodology has also been applied to residential mooring sites. These are assessed after housing and employment sites. Please note, the HELAA methodology was not produced with assessing sites for residential moorings in mind per se, but has been used. A Topic Paper relating to Residential Moorings has been produced to accompany the HELAA⁵.

1.3 NPPG requirements for the HELAA

The NPPG states some core outputs expected from a HELAA to ensure consistency, accessibility and transparency:

NPPG requirement	Place in this document
a list of all sites or broad locations considered,	The sites are:
cross-referenced to their locations on maps	Hedera Housing Thurne
	<u>Utilities Site, Norwich</u>
	Pegasus, Oulton Broad
	<u>Marina Quays, Great Yarmouth</u>
	<u>Marina Quays, Great Yarmouth (Preferred</u>
	Options representation)
	<u>Brownfield Land off Station Road, Hoveton</u>
	Loaves and Fishes, Beccles
	 Former Queen's Head Pub, St Olaves
	<u>Church Close, Chedgrave</u>
	<u>Thunder Lane, Thorpe St Andrew</u>
	Land at Tiedam, Stokesby
	Blackgate Farm, Great Yarmouth
	Broadland Nursery, Ormesby St Michael
	<u>Site Opposite Morrisons, Beccles</u>
	• Former More and Co, Staitheway Road,
	Wroxham.
	<u>Riverside House, Woodsend, Kirby Bedon</u>

that could be delivered on each site/broad	
location, including a reasonable estimate of build	
out rates, setting out how any barriers to	
delivery could be overcome and when	
An indicative trajectory of anticipated	See Appendix A: Housing Trajectory and
development and consideration of associated	Residential Moorings Trajectory
risks.	
The assessment should also be made publicly	This document will be placed on the Local Plan
available in an accessible form	website.

1.4 What the HELAA is and what the HELAA is not

It is important to note that a '*The assessment is an important evidence source to inform plan making* **but does not in itself determine whether a site should be allocated for development.** This is because not all sites considered in the assessment will be suitable for development (e.g. because of policy constraints or if they are unviable). It is the role of the assessment to provide information on the range of sites which are available to meet need, but it is for the development plan (emerging Local Plans) themselves to determine which of those sites are the most suitable to meet those needs' - PPG Reference ID: 3-003-20140306

Important: a Housing and Economic Land Availability Assessment does not allocate land for development. That is the role of the Local Plan. The assessment does not determine whether a site should be allocated or given planning permission for development. The inclusion of a site as 'suitable' in the assessment does not imply or guarantee that it will be allocated, nor that planning permission would be granted should an application be submitted for consideration.

Including a suitable site with identified development potential within a HELAA document does NOT confer any planning status on the site, but means only that it will be considered as part of local plan production for potential development in the future and, where relevant, for potential inclusion on a statutory Brownfield Sites Register. No firm commitment to bring a site forward for development (either by the commissioning local planning authorities or other parties) is intended, or should be inferred, from its inclusion in a HELAA.

1.5 <u>Colour coding used in table</u>

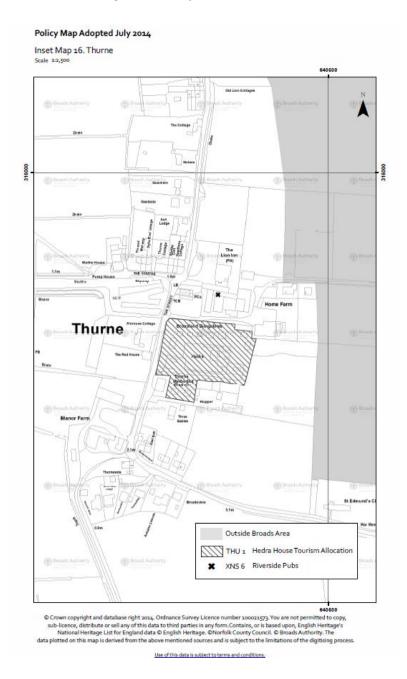

Turning to the colour coding used in the HELAA. Please refer to the HELAA Methodology for explanations for the colour used. Please note that on occasion, coloured striping has been used in this HELAA. This reflects that on occasion some sites do not have a set potential use as the constraints could affect the acceptable usage. This is explained in the accompanying text.

1.6 <u>Next steps</u>

Following assessment in the HELAA, these sites will be considered in the round as there could be other issues to consider when deciding to allocate or not these sites that are not assessed in the HELAA. Please see the document called Proposed Site Allocations Assessment on the Evidence webpage.

2 Hedera Housing Thurne

Proposed land use: market housing and holiday accommodation.

Go here for map bundle which also shows constraints: <u>http://www.broads-authority.gov.uk/___data/assets/pdf_file/0007/428119/16.-Thurne.pdf</u>

According to the HELAA assessment, the site is not suitable for development.			

3 Utilities Site, Norwich

Proposed land use – market and affordable housing.

Go here for map bundle which also shows constraints: http://www.broads-authority.gov.uk/ data/assets/pdf file/0007/428092/9.-Thorpe.pdf

Site address: Utilities Site, Norwich		
Current planning status e.g. with permission, allocated, suggested through the Call for Sites etc.	Allocated in the Sites Specifics Local Plan 2014.	
Site Size (hectares)	4.64 Hectares	
Greenfield / Brownfield	Brownfield.	
Ownership (if known) (private/public etc.)	Private	
Absolute Constraints Check		

Is the site in a		
SPA, SAC, SSSI or Ramsar		No
National Nature Reserve		No
Ancient Woodland		No
Flood risk zone 3b		No
Scheduled Ancient Monumen	t	No
Statutory Allotments		No
Locally Designated Green Spa	ce	No
At risk from Coastal Erosion		No
If yes to any of the above, site	will be excluded from	further assessment.
Development Potential		
(number of dwellings, hectares of	employment land or tov	vn centre use floor space):
Mixed use scheme. Potentiall	y 120 dwellings.	
Density calculator		25.9 dwellings per hectare
Suitability Assessment		
Constraint	Score	Comments
	(red/amber/green)	
Access to site		Likely to require a bridge over the river.
Accessibility to local services		Being central to Norwich, there are many
and facilities		services and facilities.
Utilities Capacity		Generally acceptable although detail
		regarding sewerage disposal required.
Utilities Infrastructure		Two large pylons. Gas pipe.
Contamination and ground		There have been past commercial and
stability		industrial activities. Nothing to suggest this
		cannot be satisfactorily addressed however.
Flood Risk		Flood zone 2
Coastal Change		
Market Attractiveness		Located by a river with access to many
		services and facilities, it is likely to be
		attractive to people to live in.
Impact	Score	Comments
	(red/amber/green)	
Nationally and Locally		Whilst in the Broads, this is an urban area of
Significant Landscapes		the Broads and is brownfield land.
Townscape		Appropriate change in this area could
		enhance the Broads.
Biodiversity and Geodiversity		No species surveys have been completed for
		this HELAA. The site is semi natural habitat on
		edge of Norwich. Near to County Wildlife Site.
		Is brownfield land which has been unused for
		some time so potential for open mosaic
		habitat. Striped colour to reflect potential.
Historic Environment		Likely to be of archaeological interest.

Open Space			
Transport and Roads		A	Access is an important consideration. Could
		r	equire a new bridge over the river. New
		d	wellings and the traffic generated is also
		i	mportant to consider. But this is part of a
		v	vider scheme (if land located in neighbouring
		le	ocal planning authorities considered).

Is the site in a	
SPA, SAC, SSSI or Ramsar	No
National Nature Reserve	No
Ancient Woodland	No
Flood risk zone 3b	Within flood zone 2 and 3a. Some
	proposals do seem to be in front of the
	flood defences so could be flood zone 3b.
Scheduled Ancient Monument	No
Statutory Allotments	No
Locally Designated Green Space	No
At risk from Coastal Erosion	No

If yes to any of the above, site will be excluded from further assessment.

Development Potential

(number of dwellings, hectares of employment land or town centre use floor space):

Proposed land use is market residential, holiday homes and moorings.

- Retention of 34 moorings of which 4 shall be retained solely for visitors;
- Provision of 11 houseboat moorings;
- 12 new holiday units as permanent structures; and
- 5 new permanent residential dwellings.

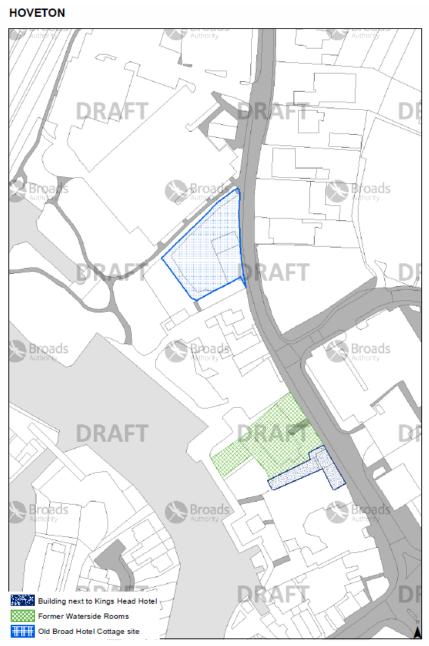

Density calculator		12.06 per Ha
Suitability Assessment		
Constraint Score		Comments
	(red/amber/green)	
Access to site		The access from Caister Road is an important
		consideration.
Accessibility to local services		Many services provided in Great Yarmouth.
and facilities		But the larger area extends the site further
		from the urban area of Great Yarmouth. So to
		the northern extent, fewer services within
		1.2km. Striped as the final layout could ensure
		residential is nearer to services.
Utilities Capacity		
Utilities Infrastructure		
Contamination and ground		The site is partly on and near to flood
stability		defences.
Flood Risk		Within flood zone 2 and 3a. Some proposals
		do seem to be in front of the flood defences so
		could be flood zone 3b. Striped as this could
		be dealt with through design.
Coastal Change		Note that the site is subject to tides.
Market Attractiveness		The site could be attractive to people to live,

		stay or moor their boats although no	
		justification for such uses has been submitted	
		with the representation so striped.	
Impact	Score	Comments	
Impact	(red/amber/green)	Comments	
Nationally and Leastly	(red/amber/green)	The site is within the Dreads. It is on the	
Nationally and Locally		The site is within the Broads. It is on the	
Significant Landscapes		urban/rural fringe of Great Yarmouth. Change	
		on one hand will regenerate the site as there	
		are empty buildings there. On the other hand,	
		depending on the design, the area could	
		become more urban. That being said, the	
		proposal is for a larger area than the current	
		allocation which extends the site further from	
		the urban area, so landscape impact could be	
		greater.	
Townscape		Change will regenerate the site as there are	
		empty buildings there.	
Biodiversity and Geodiversity			
Historic Environment			
Open Space		The Town Park is adjacent to the site.	
Transport and Roads		The access from Caister Road is an important	
		consideration. With dwellings, moorings and	
		holiday accommodation having the potential	
		to result in more car trips, the junction issue	
		could be greater than the alternative land use	
		as assessed previously.	
Compatibility with		The site was a tourist hub with social club. An	
neighbouring/adjoining uses		important consideration will be amenity issues	
		on the nearby residential dwellings as well as	
		considering the town park that is adjacent to	
		the site. With dwellings, moorings and holiday	
		accommodation having the potential to result	
		in more car trips, amenity could be more of an	
		issue than the alternative land use as assessed	
		previously.

Comments			
Achievability (including viability)			
Comments	There are some important considerations as detailed in this table.		
	These could be overcome depending on design and location of		
	dwellings within the site.		
Overcoming Constraints			
Comments	Access, flood risk, design, amenity, landscape impact. The		
	constraints could be overcome depending on design and layout.		
Trajectory of development			
Comments	-		
Barriers to Delivery			
Comments	Access, flood risk, design, amenity, landscape impact.		
Conclusion (e.g. is included in the theoretical capacity)			
The original allocation includes the rundown buildings. This proposal includes a larger area that			
extends beyond the urban area. Some of the proposals seem to put vulnerable land uses in areas of			
greater risk of flooding. Depending on final layout and design, this scheme could contribute to OAN.

Constraint	Score	Comments	
	(red/amber/green)		
Access to site		Access could be via Whitlingham Lane rather than	
		directly onto Thorpe Road which is generally	
		acceptable. There could still be a requirement for	
		improvements.	
Accessibility to local		Excellent access by foot and public transport to a	
services and facilities		variety of services (as it is on the fringe of Norwich).	
Utilities Capacity		No information to indicate an issue.	
Utilities		There is an electricity substation on site.	
Infrastructure			
Contamination and		No obvious reason to consider the site is	
ground stability		contaminated.	
Flood Risk		Flood Zone 3. No buildings on site, but site is other side	
		of railway – could be 3b therefore? Potential for site to	
		be laid out in a way to reflect flood risk.	
Coastal Change		Not near the coast.	
Market		To reflect location, likely to be attractive.	
Attractiveness			
Impact	Score	Comments	
	(red/amber/green)		
Nationally and		Not so much the setting, but the view into the Broads.	
Locally Significant		The general character along Thorpe Road is that of	
Landscapes		development interspersed with open spaces (such as	
Townscape		Thorpe River Green, the Cemetery and this site).	
Biodiversity and		The site is generally open and left to be overgrown	
Geodiversity		thus providing a potentially important resources for	
		biodiversity. Likely to be important in terms of	
		ecological networks as it is within a large built up area.	
Historic		Given the flood constraints on the site the	
Environment		development would likely be laid out so buildings are	
		immediately adjacent to the road side of the site and	
		would therefore have the maximum adverse visual	
		impact on the conservation area.	

Open Space		Т	This could be classed as an area of (amenity) open	
Open space			pace although not open to the public.	
		5		
Transport and Roads				
Compatibility with			Notwithstanding the impact on the views over the site	
neighbouring/adjoini			o the Broads, there is residential on one side and	
ng uses			businesses on the other side of the site. There is a train	
			ine. So through design, development could be	
			compatible.

Locally Designated Green Space		No	
At risk from Coastal Erosion		No	
If yes to any of the abo	ove, site will be exclud	ed from further assessment.	
Development Potenti			
•		and or town centre use floor space): Around 4 dwellings	
Density calculator		22 dwellings per hectare	
Suitability Assessmen	t		
Constraint	Score	Comments	
	(red/amber/green)		
Access to site		Part of access is not adopted. Visibility from the access	
		directly onto The street could possibly only be	
		achieved by off-site highway works or by a Section 106	
		Agreement to secure visibility across third party land.	
		Rated Amber as a surfaced road would need providing	
		for a short length and a S106 agreement needed to	
		ensure the visibility splay is maintained in perpetuity	
Accessibility to local		Stokesby has a church, village hall, pub, shop, play area	
services and facilities		and moorings. Rates in lower third of settlements	
		assessed in the Settlements Study ⁸ and has only one	
		core service within 1.2km of site.	
Utilities Capacity		Stokesby recently received mains sewerage.	
Utilities		No obvious constraints.	
Infrastructure			
Contamination and		None obvious from site visit and history as market	
ground stability		garden/paddock. Houses adjoin the site and do not	
		seem to be affected by poor ground stability.	
Flood Risk		Flood zone 1	
Coastal Change		Not near the coast.	
Market		The Parish Council generally consider there is a need	
Attractiveness		for dwellings so this could point to dwellings in	
		Stokesby being attractive.	
Impact	Score	Comments	
	(red/amber/green)		
Nationally and		Whilst located in a National Park equivalent area, site	
Locally Significant		is situated on the periphery with little obvious impact	
Landscapes		on the Broads.	
Townscape			
Biodiversity and		Ecologist does not have any objections in principle to	
Geodiversity		this site being allocated, as long as habitat and species	
		surveys were undertaken prior to any future

Conclusion (e.g. is included in the theoretical capacity)								
Suitable according to HELAA assessment.								

26 Risk Assessment for each site

In general, there could be the following risks that affect sites coming forward as anticipated:

- Funding and viability. The requirements to make a development acceptable in planning terms could affect the viability of the proposal. For some schemes, funding may be an important factor to get them off the ground. This risk could be managed by a clear and positive allocation in the Local Plan that provides certainty as well as applicants taking advantage of the free pre-application advice the Broads Authority considers.
- Overcoming constraints on site and nearby. It is important to understand that this
 assessment has been based on a set of assumptions which on further site specific
 investigation and design could be different in reality to what has been assumed. The Policies
 Maps that accompany any allocation in the Local Plan will display constraints and these
 constraints may also be included within criteria based policies.
- Changes in land ownership. Land can be sold before planning permission is granted or once permission is granted. The appetite of the new land owner to deliver a scheme or the scheme that is permitted may be different to the previous land owner. Other than working with landowners or agents through the planning process, managing this risk could be difficult.
- Changes to economic conditions such as recessions could affect the willingness and ability for sites to be delivered. Many small home builders suffered as a result of the last recession for example. This risk is not one that can easily be managed at a local level.
- Changes to Government policy. There have been many changes to Government policy over recent years with many more to come as alluded to in the Housing White Paper.
 Furthermore, the General Election and new Government may make new policy changes over the coming years. This could affect planning policies and standards. Again, this is not a risk that can easily be managed at a local level other than being kept informed of changes and potential changes.
- BREXIT could have an impact on delivery of sites. It is not clear what changes to laws or regulations could arise as a result of BREXIT over the coming years. Another risk that is not easily managed at the local level.

Furthermore the Objectively Assessed Need for the area could have been met thus there is no need for more development sites to be allocated or less ideal sites (which have some policy issues) to be permitted.

27 Theoretical Housing Trajectory and Residential Moorings Trajectory

The theoretical housing trajectory and residential moorings trajectory is included at <u>Appendix A</u>. Please note that this housing trajectory includes the sites assessed in this HELAA which were deemed suitable in theory. It does not include non-housing proposals and it does not include housing proposals which had a red colour code in their assessment. The table below indicates 250 dwellings in theory.

c !!	Permission	Scheme	Potential delivery		
Site	potentially	potentially	over subsequent		
	granted:	started:	years:		
Hedera House	2017	2018	8 in 2018		
Thurne	2017	2018	8 in 2019		
Utilities Site			40 in 2022		
Norwich	2019	2022	40 in 2023		
NOTWICH			40 in 2024		
Pegasus	2014	2017	40 in 2018		
Oulton Broad	2014	2017	36 in 2019		
Marina Quays					
(residential and holiday home	2010	2020	9 in 2020		
proposal)	2018	2020	8 in 2021		
Great Yarmouth					
Brownfield sites	2010	2020	7 in 2020		
Hoveton	2018	2020			
Loaves and Fishes	2019	2021	1 in 2021		
Beccles	2019	2021			
Church Close	2018	2019	1 in 2010		
Chedgrave	2018	2019	1 in 2019		
Blackgate Farm	2018	2019	10 in 2019		
Great Yarmouth	2018	2019	10 11 2019		
Former More and Co	2016	2017	3 in 2017		
Wroxham	2010	2017	5 111 2017		
Derby's Quay	2010, 2013	2017	1 in 2017		
Gillingham	then 2016	2017	1 111 2017		

The second table relates to residential moorings, totalling around 65 in theory

Site	Permission potentially granted:	Scheme potentially started:	Potential delivery over subsequent years:		
Brundall Gardens Brundall	2018	2018	5 in 2018		
Hipperson's Boatyard Beccles	2018	2018	5 in 2018		
Greenway Marina, Loddon.	2018	2018	5 by 2018		
Loddon Marina.	2018	2018	40 by 2020		
Waveney River Centre Burgh St Peter	2018	2018	10 in 2018		

28 Next Steps

The HELAA is just one of the steps towards allocating land for development in the Local Plan. There are other considerations to take account of such as policy criteria and local circumstances. As a link between the HELAA and the Local Plan, the Authority has produced: 'Towards allocations - Housing and Economic Land Availability Assessment' which summarises the HELAA as well as confirming if the nomination has proceeded to an allocation or not.

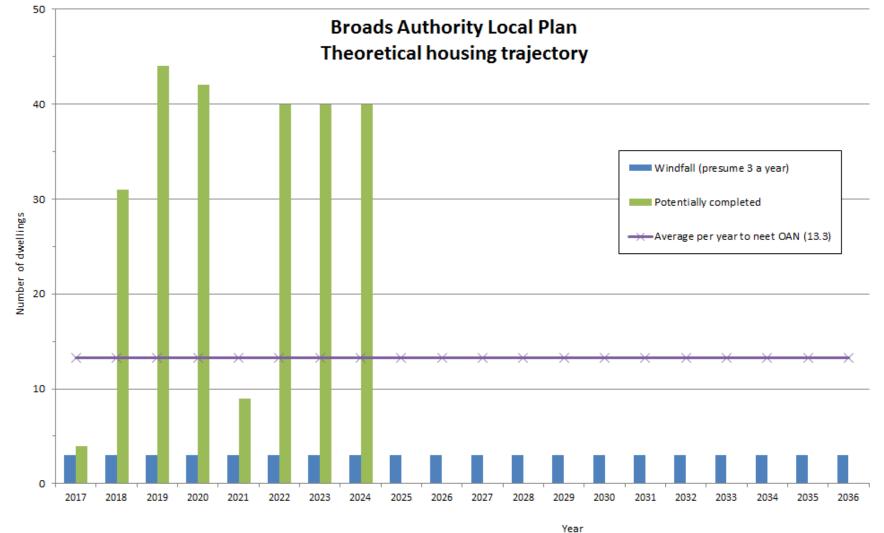

Whilst the HELAA assess site, there are other related documents that address how the need of the area is to be met. The Housing Topic Paper sets out how the housing need for the Broads will be met and the Residential Moorings Topic Paper assesses nominated sites against policy but also sets out how the residential moorings need for the Broads will be met.

All documents can be found here: <u>http://www.broads-authority.gov.uk/planning/planning-policies/development/future-local-plan/evidence-base2</u>

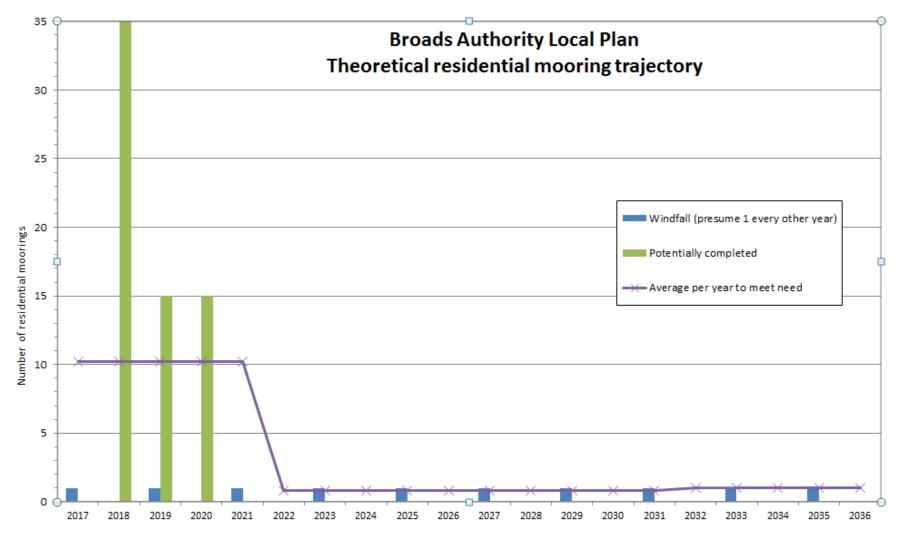

29 Conclusion

All sites put forward to the Broads Authority have been considered and so too have the current allocations in the Sites Specifics Local Plan 2014. The HELAA considerations will help inform any future policy wording if a site has been taken forward for allocation. The individual tables explain why a site has not been considered suitable. As a reminder, the HELAA is one part of the evidence base and considerations in relation to sites. Further work has been completed to assess whether these sites will be allocated in the Local Plan.

The table at <u>Appendix B</u> shows the completions and permissions between April 2015 and April 2017 and subtracts these from the Objectively Assessed Housing Need showing how many dwelling are left to be allocated.

Appendix A: Theoretical Housing Trajectory and Residential Moorings Trajectory.

Year

Appendix B: Meeting the Housing OAN of the Broads.

This table shows the completions and permissions between April 2015 and April 2017. It then shows the residual Objectively Assessed Housing Need taking into account these completions and permissions. This table shows that there is a need to allocate land for 142 across the entire Local Planning Authority. In terms of the Housing Market Areas, there is no need to allocate any more in Waveney District, but there is a need to allocate land for 105 dwellings in the Central Norfolk Housing Market Area and 63 in Great Yarmouth Borough.

	Net completions since April 2015 (as at April 2017)				Permitted not completed (as at April 2017)				OAN in	OAN less completions and
