

Planning reference:

Planning applications and the use of artificial intelligence (AI)

The Broads Authority recognises that artificial intelligence can be used to support planning application work, and that this can be done positively when it is used effectively and transparently.

We therefore require confirmation of this as part of the validation process. Where generative AI has been used, please complete the document details table below. Then complete and sign the declaration on page 2 and return the whole form to planning@broads-authority.gov.uk as soon as possible.

Details of documents where generative AI has been used

Where generative AI has been used in the preparation of documents submitted with this application, please identify each document below and briefly state how AI was used. Examples may include drafting assistance, proofreading/editing, summarising information or document formatting.

If generative AI has not been used in any submitted documents, this table may be left blank.

Document name / title	Date / version	How AI was used

After completing this table, please complete and sign the declaration on page 2.

Declaration

I confirm that generative AI has:

☐ **BEEN USED**☐ **NOT BEEN USED**

as part of the planning application referenced above.

Where generative AI has been used, I confirm that I fully stand behind the evidence submitted in support of the proposed development as an accurate reflection of the proposal.

I also confirm that, where generative AI has been used, it has been used appropriately, the information produced has been checked for accuracy, and its use complies with applicable legal requirements, including copyright, data protection and confidentiality.

Before signing, please make sure that the document details table on page 1 has been completed where generative AI has been used.
